

2005 Products Catalogue

Drivers

Great Big Bertha II 415

Proven performance.

Proprietary manufacturing technologies take clubface efficiency right to the limit. Advanced thinning and strengthening processes create optimal energy transfer over an incredibly large area of the clubface for exceptional ball speed—even on off-center hits.

Proven titanium construction for an incredibly stable Center of Gravity and long, forgiving performance that could only come from Callaway Golf.

It's a name that means performance—and a name that golfers across the world's professional tours trust to win tournaments. The Great Big Bertha II 415 Driver utilizes an advanced fabrication process that makes the face thinner, stronger and more forgiving over a larger area. The large 415cc titanium head means more resistance to twisting—which means more potential distance—and more hallmark Callaway Golf forgiveness.

Patented Callaway Golf technologies include Short Straight Hollow Hosel (S2H2) design that repositions weight from the hosel area to the perimeter. Plus, Tru-Bore technology provides improved feel and clubhead control.

Big Bertha Titanium 454

Big Bertha distance and forgiveness.

The new Big Bertha Titanium 454 Driver is the biggest Big Bertha driver ever. The big 454cc size means more hallmark Big Bertha performance: more forgiveness, more confidence, and more distance. The extra large clubhead provides more stability—thanks to a higher Moment of Inertia created by maximizing perimeter weighting—for more accuracy off the tee. Plus an ultra-thin, formed face creates a huge sweet spot that delivers increased ball speed. The new Big Bertha Titanium 454 Driver: the tradition continues.

Proven titanium construction for long, forgiving performance that could only come from Callaway Golf.

Patented Callaway Golf technologies

include Short Straight Hollow Hosel (S2H2) design that repositions weight from the hosel area to the perimeter. Plus, Tru-Bore technology provides improved feel and clubhead control.

ERC Fusion

Breakthrough Fusion Technology.

Forged titanium cup-face design with VFT Technology

delivers hot performance that conforms to USGA rules and increases forgiveness by moving weight to the perimeter of the face.

Lightweight composite body with internal weighting

has three times more discretionary weighting than an all-titanium driver of the same size. This allows us to increase perimeter weighting and create a precise Center of Gravity for distance-enhancing trajectory and stability.

The 360cc ERC Fusion Driver is driven by more than **54** patents on its innovative technology.

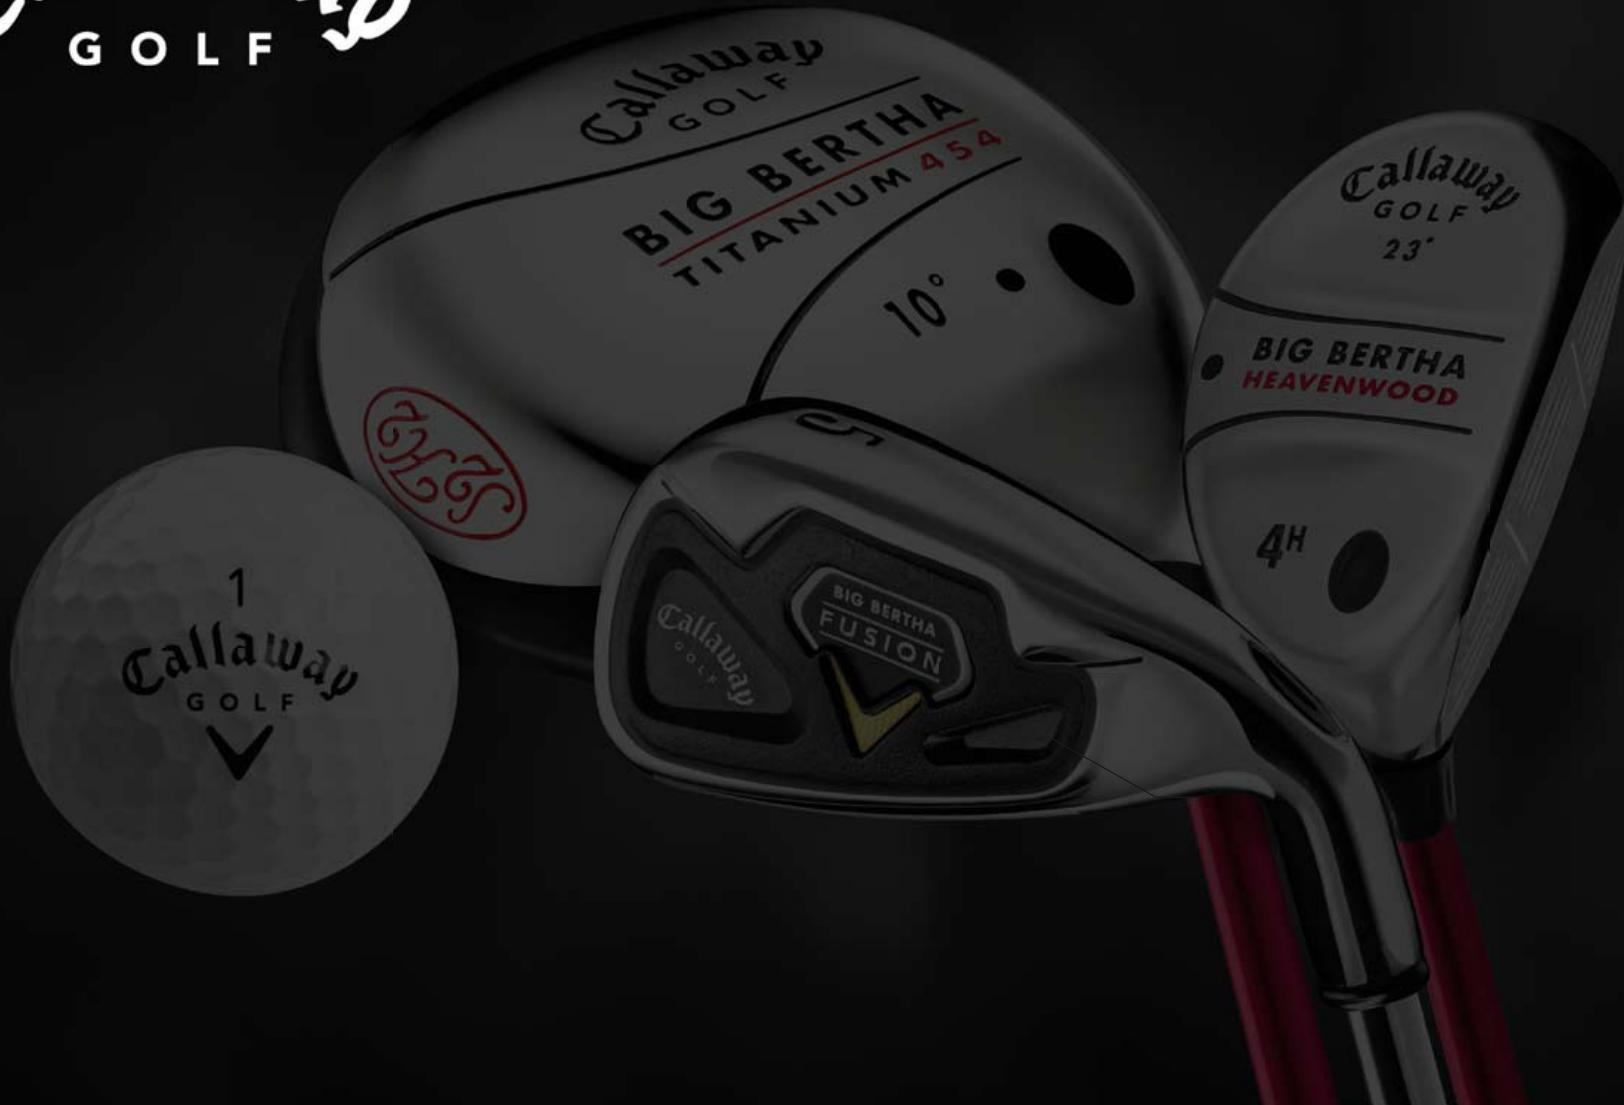

Fusion Technology creates performance that no all-titanium driver can match.

Callaway Golf has created a powerful chemical reaction with the introduction of the ERC Fusion Driver. This driver's explosive distance is the result of our breakthrough Fusion Technology, which blends the best elements of titanium and carbon composite material into an exciting new mixture. Titanium and composite, power and precision, technology and playability—ERC Fusion brings it all together.

Fairway Woods

Big Bertha Fairway

Legendary playability and forgiveness.

Big Bertha Fairway Woods offer all the forgiveness and playability that made their name famous. No wonder our broadest offering of fairway woods is the choice of more players of more ability levels than any other fairway wood. Every club in the family delivers long-driving, fairway-seeking performance and exceptional value.

Modified version of the legendary War Bird sole for outstanding performance from any lie.

Distance-enhancing trajectory and increased forgiveness created by adjusting wall thickness around the ribbon for an optimized Center of Gravity.

Our broadest offering of Big Bertha Fairway Woods ever, including Strong 5-wood, Strong 7-wood, 9-wood and 13-wood.

Big Bertha Heavenwood Hybrids

NEW FOR
'05

Cures fear of long shots.

After years of development and testing, Callaway Golf offers a solution for the millions of golfers that dread long iron shots. The new Big Bertha Heavenwood Hybrids are the perfect alternative for golfers of all ability levels that struggle to hit 1-, 2-, 3-, 4- and 5-irons well on a consistent basis. These revolutionary hybrid clubs provide all the performance of long irons, and all the forgiveness of fairway woods. An elongated, narrow face profile creates an extremely low Center of Gravity to get the ball airborne quickly and easily while the modified War Bird sole design helps promote solid contact from the fairway, rough or sand. The new Big Bertha Heavenwood Hybrids: never fear a long iron shot again.

ERC Fusion Fairway

Moves more weight to hit it high and straight.

ERC Fusion Fairway Woods are an entirely new concept in fairway wood technology with multi-material construction for performance that no single-material fairway woods can match. Groundbreaking Fusion Technology delivers more stability, accuracy and distance than ever before. A cast stainless steel face, sole and body are fused with a lightweight carbon composite crown that wraps around the back ribbon of the clubhead, allowing Callaway Golf to put weight where it's really useful.

Proven Callaway Golf technologies
such as Variable Face Thickness Technology (VFT), S2H2, and Tru-Bore combine with multi-material construction for a new benchmark in fairway wood performance.

Fusion Technology allows Callaway Golf to reposition clubhead weight low and rearward for unprecedented forgiveness and performance in fairway woods.

Irons

Big Bertha

A tradition of fun and forgiveness.

Wide, constant-width sole design decreases digging on fat shots and helps each iron move through the turf.

Notch Weighting moves mass toward the heel and toe for increased forgiveness and reduced distance loss on off-center hits.

Core technologies include S2H2, Tru Bore, Variable Face Thickness Technology (VFT), and 360-degree undercut channel for improved efficiency, feel and unmatched forgiveness.

All the fun and forgiveness you love with updated Callaway Golf core technologies for great friendly feel and cutting-edge looks. Big Bertha Irons are a great choice for players looking for clubs that provide a proven combination of performance, forgiveness, and game enjoyment.

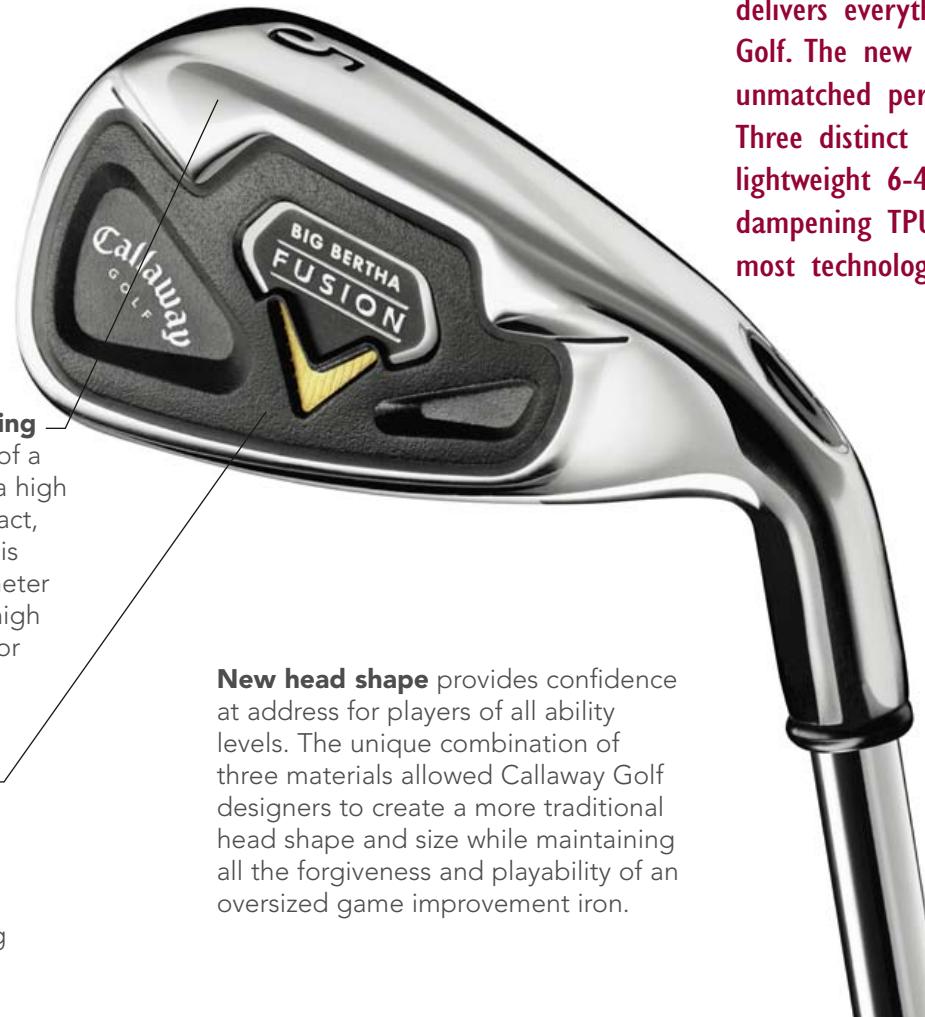

High-polish finish and a unique numbering system of #2 through #10, W, S, and L delivers consistent loft spacing through the short irons and wedges.

Big Bertha Fusion

NEW FOR
'05

The most un-traditional traditional-looking irons you'll ever play.

Fusion Technology—Callaway Golf's innovative weight distribution technology—is pushed to the limit in the new Big Bertha Fusion Irons. This radical design delivers everything you would expect from Callaway Golf. The new Big Bertha Fusion Irons play longer, offer unmatched performance and playability, and look great! Three distinct materials—a dense Tunite alloy cradle, lightweight 6-4 titanium face, and special vibration-dampening TPU SenSert—are married together in our most technologically advanced irons ever manufactured.

Titanium face is 35% lighter than a comparable steel face, allowing more mass to be moved to the club perimeter for forgiveness and increased effective hitting area.

X-18 Irons and X-18 Pro Series

NEW FOR
'05

The X-Series legacy of performance and forgiveness continues.

X-Series Irons from Callaway Golf have long been favored by some of the best players in the world because of their performance-enhancing technologies and by recreational golfers due to their forgiveness and great looks. The new X-18 and X-18 Pro Series Irons combine many of the same patented Callaway Golf core technologies used in earlier X-Series models with a new traditional head shape and size, and high-polish finish. The X-Series legacy of performance continues.

Deeper 360-Degree Undercut Channel
maximizes perimeter weighting, allowing more weight to be moved to the heel and toe, thereby improving forgiveness.

Extreme Notch Weighting
raises the Moment of Inertia for increased stability and reduced distance loss on off-center hits.

Core technologies include S2H2, Tru-Bore and Variable Face Thickness Technology (VFT) for improved efficiency, feel and unmatched forgiveness.

Putters

[Index](#) [View](#) [Print](#) [Exit](#)

| [Diagram](#) | [Custom](#) | [Specifications](#) |

Tour Blue

For those who believe putting is both an art and a science.

The iridescent metallic blue color is applied with a special process, creating a unique finish on each putter that is made.

The combination of titanium and tungsten leads to optimal weight distribution throughout each putter.

Each putterhead is completely machine-milled for added consistency and precision.

Commercially pure titanium body (comprised of more than 99-percent titanium) is softer than steel for a pleasing and responsive feel on each putt.

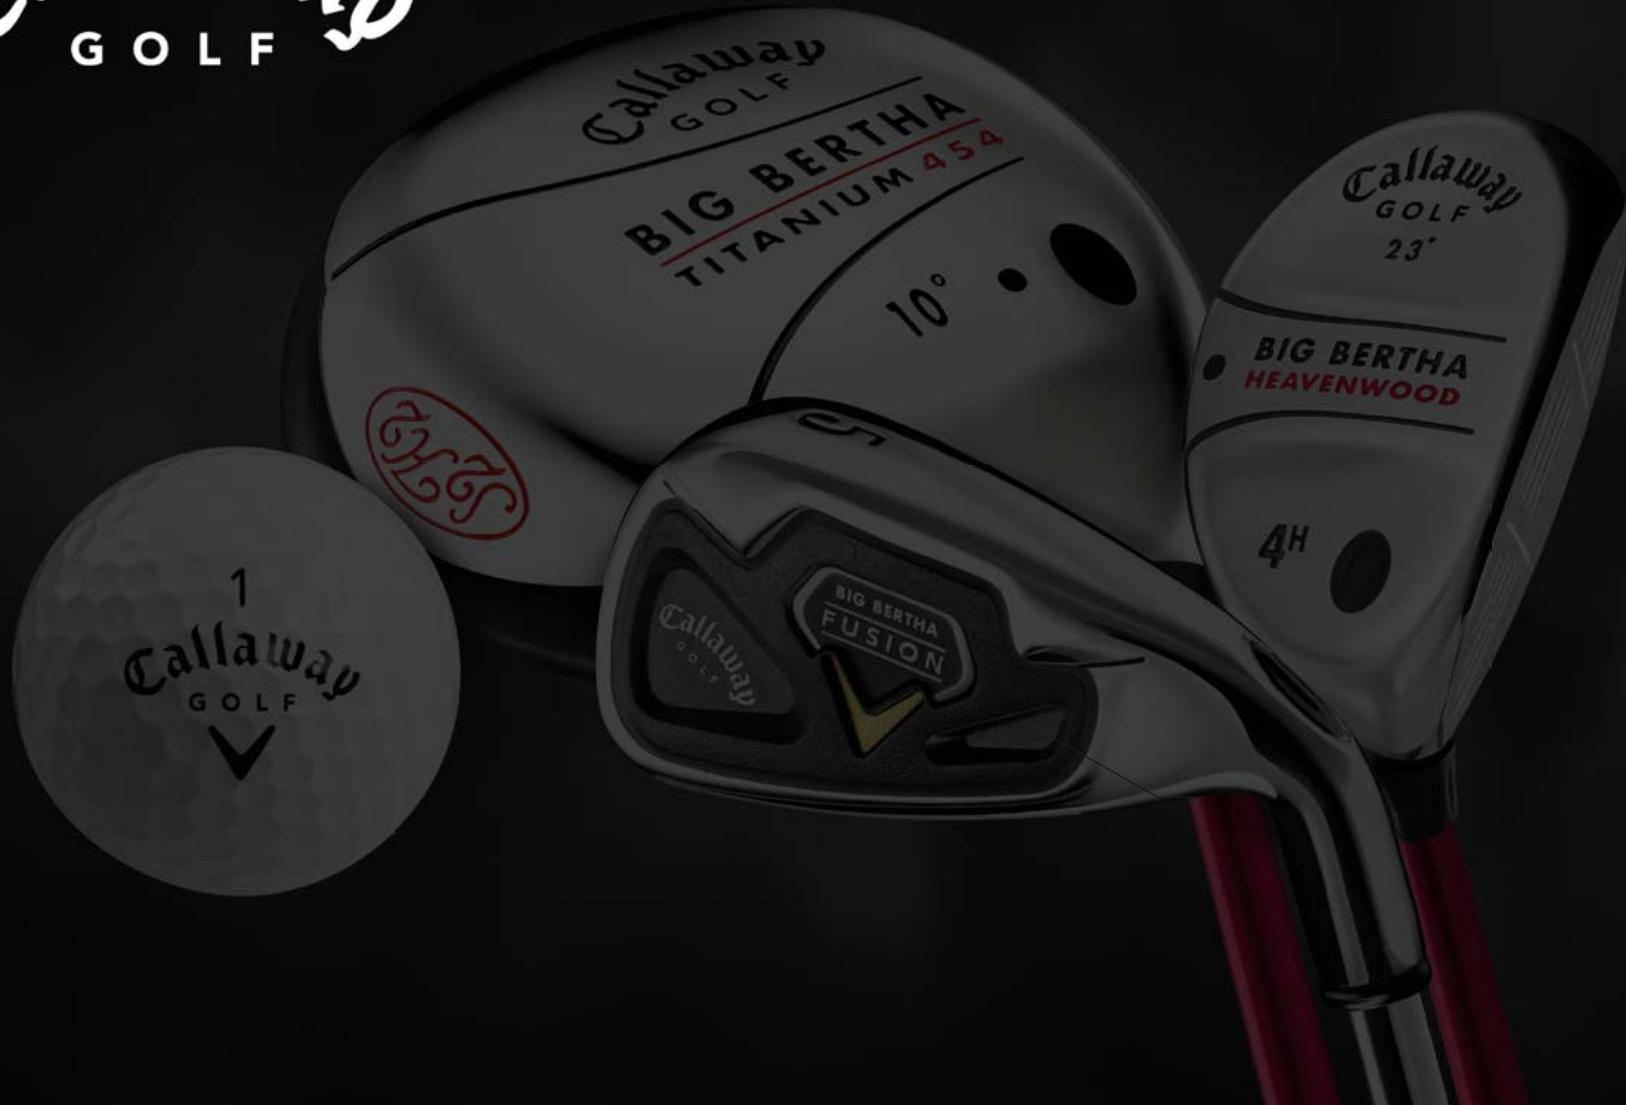

Tungsten weights in the heel and toe dramatically increase forgiveness and help produce a smooth roll.

Everything about Callaway Golf Putters is impressive. From the high-performance titanium-tungsten design to the unique blue finish, there's nothing else crafted like a Tour Blue Putter.

Golf Balls

[Index](#) [View](#) [Print](#) [Exit](#)

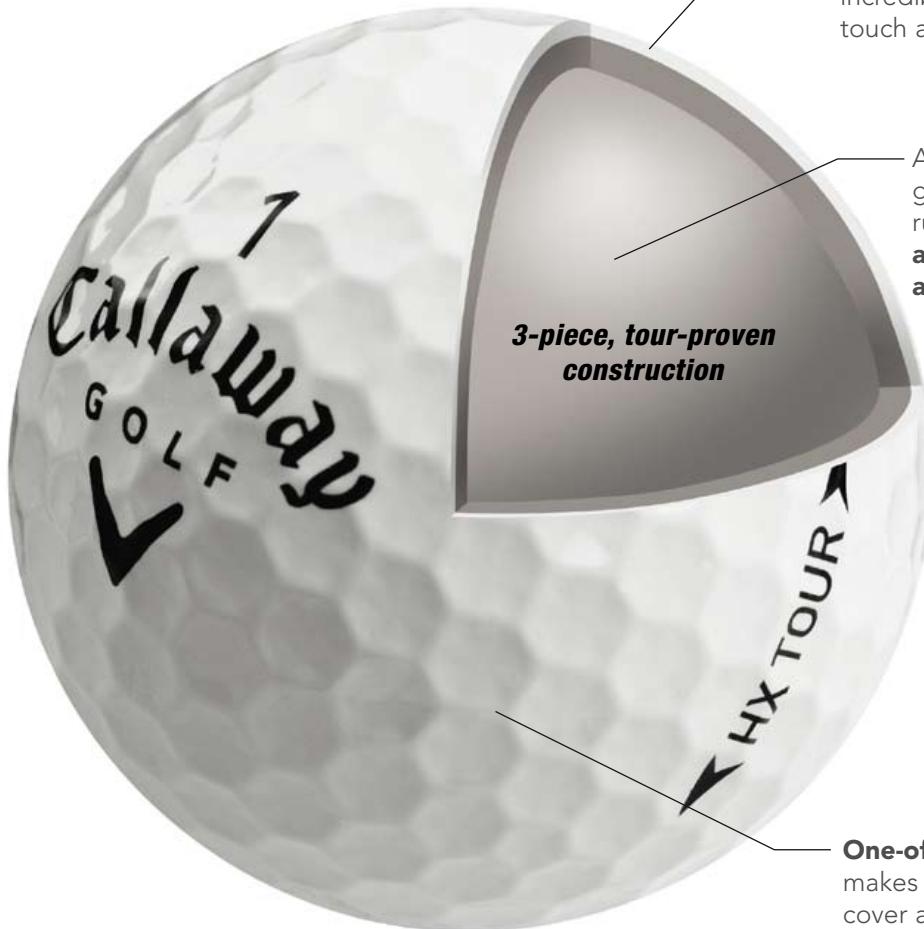

| [Diagram](#) | [Custom](#) | [Specifications](#) |

HX Tour Golf Balls

Advanced technology for tour-level performance.

Our most **technologically advanced** ball yet. With a very thin cover, HX Tour offers professional velocity, incredible flight performance and soft touch around the greens.

A new chemical composition gives the HX Tour a large rubber core that is both **fast and soft, improving distance and feel.**

One-of-a-kind HEX Aerodynamics makes for a virtually seamless cover and enhanced shot-to-shot consistency.

With more 2004 tour wins and top tens than any of our golf balls, HX Tour with revolutionary **HEX Aerodynamics** has set a new standard for premium performance. Our most technologically advanced ball features a very thin cover combined with a firm boundary layer and large core for unbelievable distance, longer and straighter ball flight, and soft touch around the greens. For the most advanced, tour-level performance, look no further.

The HX Tour is available only in **Black**, representing the finest golf ball Callaway Golf has ever produced.

HX Red and Blue Golf Balls

HEX Aerodynamics gets smarter.

High-resilience core is a faster formulation that increases ball speed, resulting in more distance for the widest range of swing speeds.

Solid core, 3-piece construction is proven Callaway Golf ball technology - without compromise - that provides superior distance, spin and consistency.

Super-thin thermoplastic urethane cover at 0.036-inch reduces spin off the driver for greater ball velocity and more overall distance. New formulation increases distance and durability while maintaining greenside spin and control.

Red for more distance,
Blue for more spin.

Improved HEX Aerodynamics features the same aerodynamic pattern found on the HX Tour Golf Ball, further reducing drag and increasing lift for more stability and distance than ever.

The tour-level golf balls that pushed the envelope on 3-piece technology are new and improved with increased durability, feel and distance. The second-generation HX Red and Blue Golf Balls have better HEX Aerodynamics, a faster core formulation and an all-new thermoplastic urethane cover.

HX Hot Golf Balls

Hot off the clubface for high velocity distance

HEX Aerodynamics reduces drag and increases lift for high velocity off the clubface and ultra-hot distance.

Solid core, 3-piece construction gets a high-octane kick with the combination of an ionomer cover and an ionomer boundary layer.

Soft boundary layer reacts like rubber and works with the high-resilience core to increase ball velocity while maintaining a soft feel. The fastest, firmest Callaway Golf cover reduces driver spin for long, penetrating trajectory and great responsiveness.

High-resilience core is packed with power and increases ball speed, resulting in hotter performance and more distance for the widest range of swing speeds.

Hot off the clubface for high velocity distance, the new HX Hot Golf Ball features a fast core, soft and resilient boundary layer, and a firm cover. To create this unique, 3-piece golf ball, Callaway Golf engineers took the best attributes found in modern materials and combined them with our revolutionary HEX Aerodynamics—one of the game's most talked about advances in golf ball technology. Now things get even hotter.

Big Bertha Golf Balls

2-piece distance technology for power and performance.

The soft, low-compression core feels great, adding resiliency and maximum distance potential.

Red for more distance,
Blue for more spin.

The soft, durable ionomer cover is designed for more spin around the greens while maintaining maximum distance off the tee.

Big Bertha power and performance, now available in a golf ball. The Big Bertha Red and Blue Golf Balls are 2-piece golf balls designed to maximize distance as well as your enjoyment of the game.

Warbird

Binoculars not included.

If distance is your thing, then this is your ball. Callaway Golf's Warbird Golf Ball gives you more affordable long distance than a phone company—and you might be able to drive one into the next area code.

2-piece golf ball **built for distance** and golfers who love to watch it fly.

High-energy core helps you get the most out of every swing.

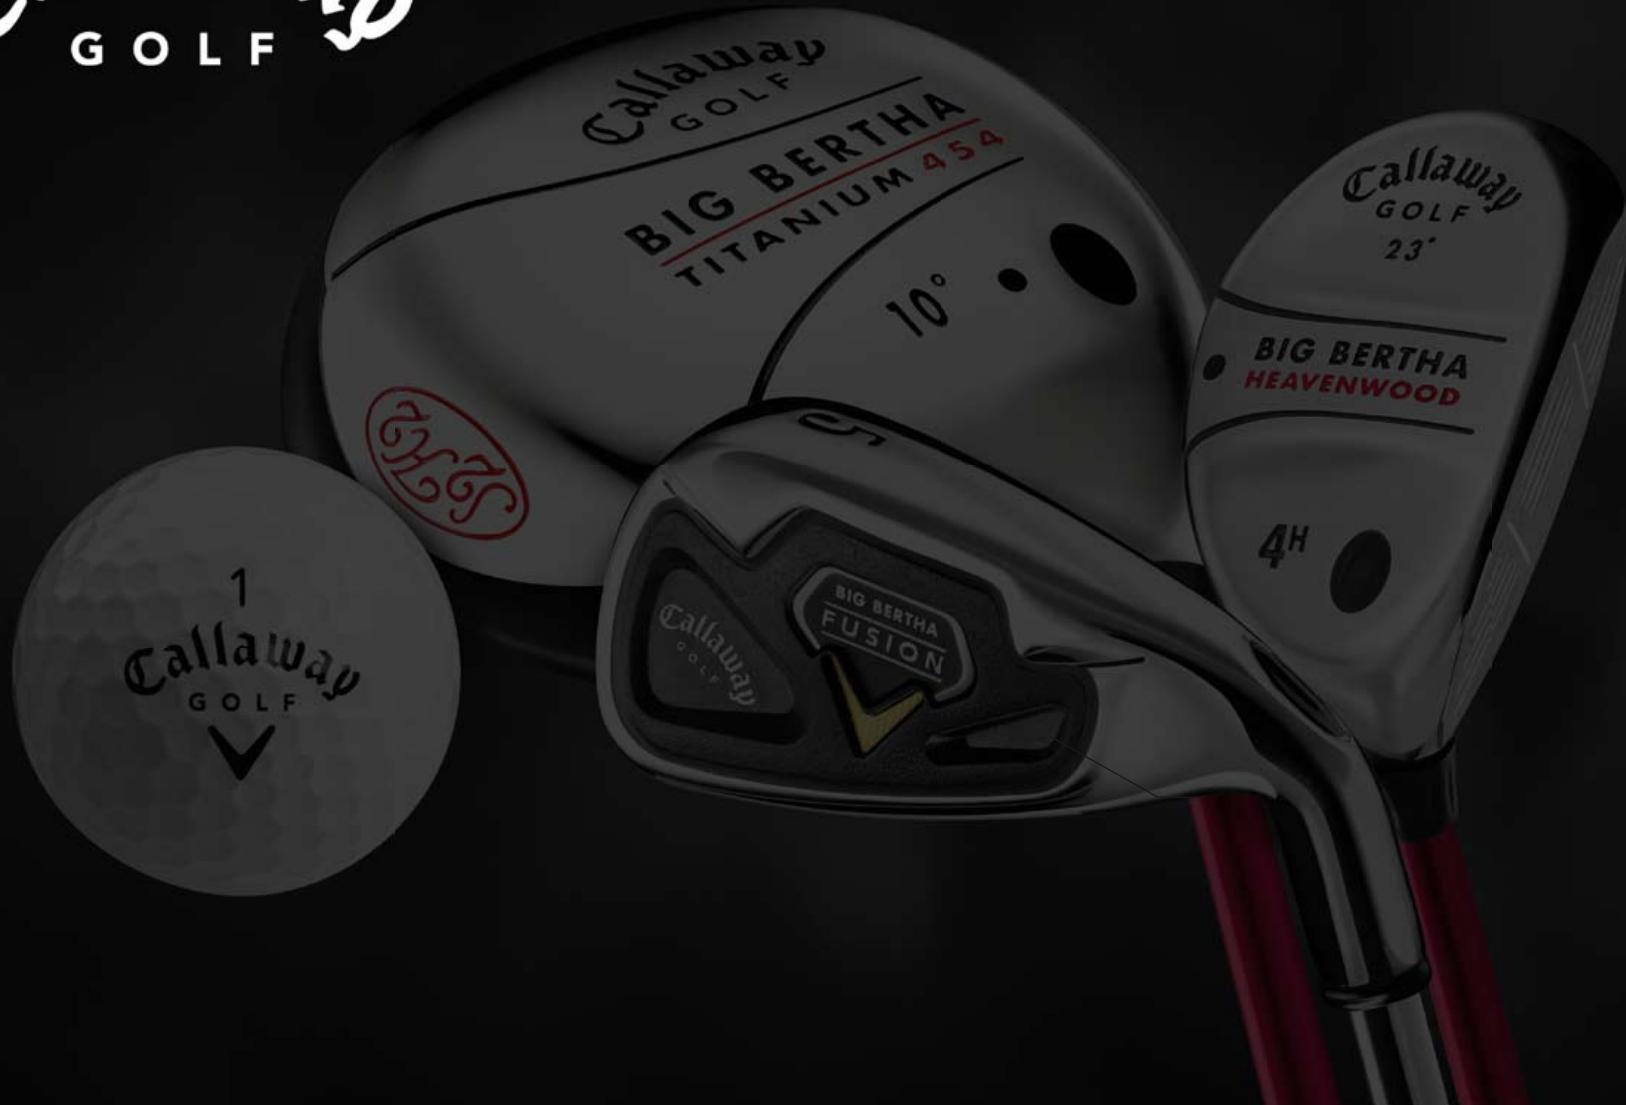

Firm ionomer cover designed to maximize distance.

Highly efficient dimple pattern increases surface coverage for long distance and strong ball flight.

Women's Products

Big Bertha Titanium 454 Drivers and Big Bertha Stainless Steel Fairway Woods

Big Bertha power, confidence and forgiveness.

Proven technology that delivers long, forgiving performance and confidence that could only come from Callaway Golf; in popular Champagne, Shiraz and Medium Blue colors for a refined, lustrous appearance.

Big 454cc driver size means a high Moment of Inertia for more resistance to twisting on off-center hits. Lofts like the 13-degree and new High Trajectory options help golfers with more deliberate swing speeds achieve distance-enhancing launch angles and trajectories.

Three-part stainless steel fairway wood construction includes innovative internal weight chip and the modified War Bird sole for great playability from off the tee or any lie.

Every club Callaway Golf makes is available in a version that is optimized for the unique swing needs of many women—including the new Big Bertha Titanium 454 Driver in a special new High-Trajectory version—with lighter, shorter shafts, smaller grip sizes and swingweights designed to help female golfers enjoy more forgiveness, confidence and distance in their games.

Patented Callaway Golf technologies include Short Straight Hollow Hosel (S2H2) design that repositions weight from the hosel area to the perimeter, plus Tru-Bore technology provides improved feel and clubhead control. Variable Face Thickness Technology (VFT) in the Big Bertha Fairway Woods delivers forgiveness and distance.

Big Bertha Heavenwood Hybrids

Cures fear of long shots.

Elongated, low profile face inspires confidence at address and creates a high Moment of Inertia. That means more resistance to twisting, more stability and forgiveness.

Optimized club lengths deliver more clubhead speed for greater distance than long irons and more control for greater accuracy than comparatively lofted fairway woods.

New Big Bertha Heavenwood Hybrids are revolutionary clubs that deliver all the performance and feel of an iron, all the forgiveness and trajectory of a fairway wood, with shafts optimized for a woman's unique swing needs. They're the choice for women golfers of all abilities who struggle to hit long irons well on a consistent basis.

Hybrid design delivers all you expect from the Big Bertha name with outstanding playability anywhere on the course and shafts optimized for a woman's unique swing needs.

Modified War Bird sole minimizes turf resistance and promotes solid contact for added distance and ball trajectories that land solidly on the green. Its versatile design makes it a great chipping club around the green.

Cutting edge technology makes Callaway Golf a leader in irons that perform for players of every level, from beginner to professional. Women golfers will find the exceptional performance of Fusion Technology optimized to their needs in the new Big Bertha Fusion Irons. Plus, the technology packed into the new X-18 and Big Bertha irons will allow all women to enjoy the game more.

Big Bertha Fusion Irons

The most un-traditional traditional-looking irons you'll ever play.

Innovative Fusion Technology pushes weight distribution technology to the limit in the new Big Bertha Fusion Irons for longer play, unmatched forgiveness and playability, and a stunning appearance. Three distance materials—a dense Tunite alloy cradle, lightweight titanium face, and special vibration-dampening TPU SenSert—make these Callaway Golf's best-performing and most technologically advanced irons ever. Special shafts tuned for a woman's swing characteristics in Coastal Grey color.

Big Bertha Fusion Irons Fusion Technology

- Tunite alloy cradle for unprecedented perimeter weighting.
- Lightweight titanium face for larger hitting area and increased ball speed.
- TPU SenSert tunes feel and reduces vibration in the clubhead.

X-18 Irons

The X-Series legacy of performance and forgiveness continues.

X-Series Irons are favored by some of the best players in the world for their performance-enhancing technologies and by recreational golfers for their forgiveness and great looks. The new X-18 Irons combine patented Callaway Golf core technologies with a new head shape and size. Featuring a Mother-of-Pearl medallion with shafts in Ice Blue, Champagne and Black, these irons are optimized to a woman's swing characteristics with a beautiful high-polish finish.

X-18 Iron Technology

- Extreme Notch Weighting for increased stability and reduced distance loss on off-center hits.
- Deeper 360-Degree Undercut Channel allows more weight to be moved to the heel and toe, thereby improving forgiveness.
- More traditional size and shape for workability and confidence at address.

Big Bertha Irons

A tradition of fun and forgiveness.

Big Bertha Irons for women offer fun and forgive-ness with updated Callaway Golf core technologies for great friendly feel and cutting-edge looks in Champagne and Shiraz colors. A great choice for women who want the ultimate combination of performance, forgiveness and game enjoyment. Core technologies include S2H2, Tru-Bore, Variable Face Thickness Technology (VFT) and 360-Degree Undercut Channel for improved efficiency, feel and unmatched forgiveness.

Big Bertha Iron Technology

- Wide, constant-width sole helps iron move through the turf.
- Notch Weighting increases forgiveness and reduces distance loss on off-center shots.
- High-polish finish and a unique #2 through #10, W, S and L numbering system for consistent lofts.

GES - Game Enjoyment System

More efficiency in the clubs. More enjoyment in the game.

The Game Enjoyment System is a unique concept in golf clubs. Callaway Golf has designed a set of clubs – 3 woods, 3 irons, 1 putter, 1 bag – to help women play golf more effectively. GES Clubs look different because they are designed around the swing characteristics of women. Now golfers with slower swing speeds can get the ball in the air with more ease. Fewer clubs, light in weight and exceptional in value mean more opportunity for great shots and more enjoyment.

GES Golf Clubs help newer players and those with slower swing speeds get the ball in the air, find more consistency in their shots, and have fun while building their game.

Woods – open top lowers the Center of Gravity; hit the ball higher from the tee, fairway or rough with ease.

Irons – wide sole shape keeps the club stable; hit the ball higher with more accuracy, clubs slide easily through deep grass or sand.

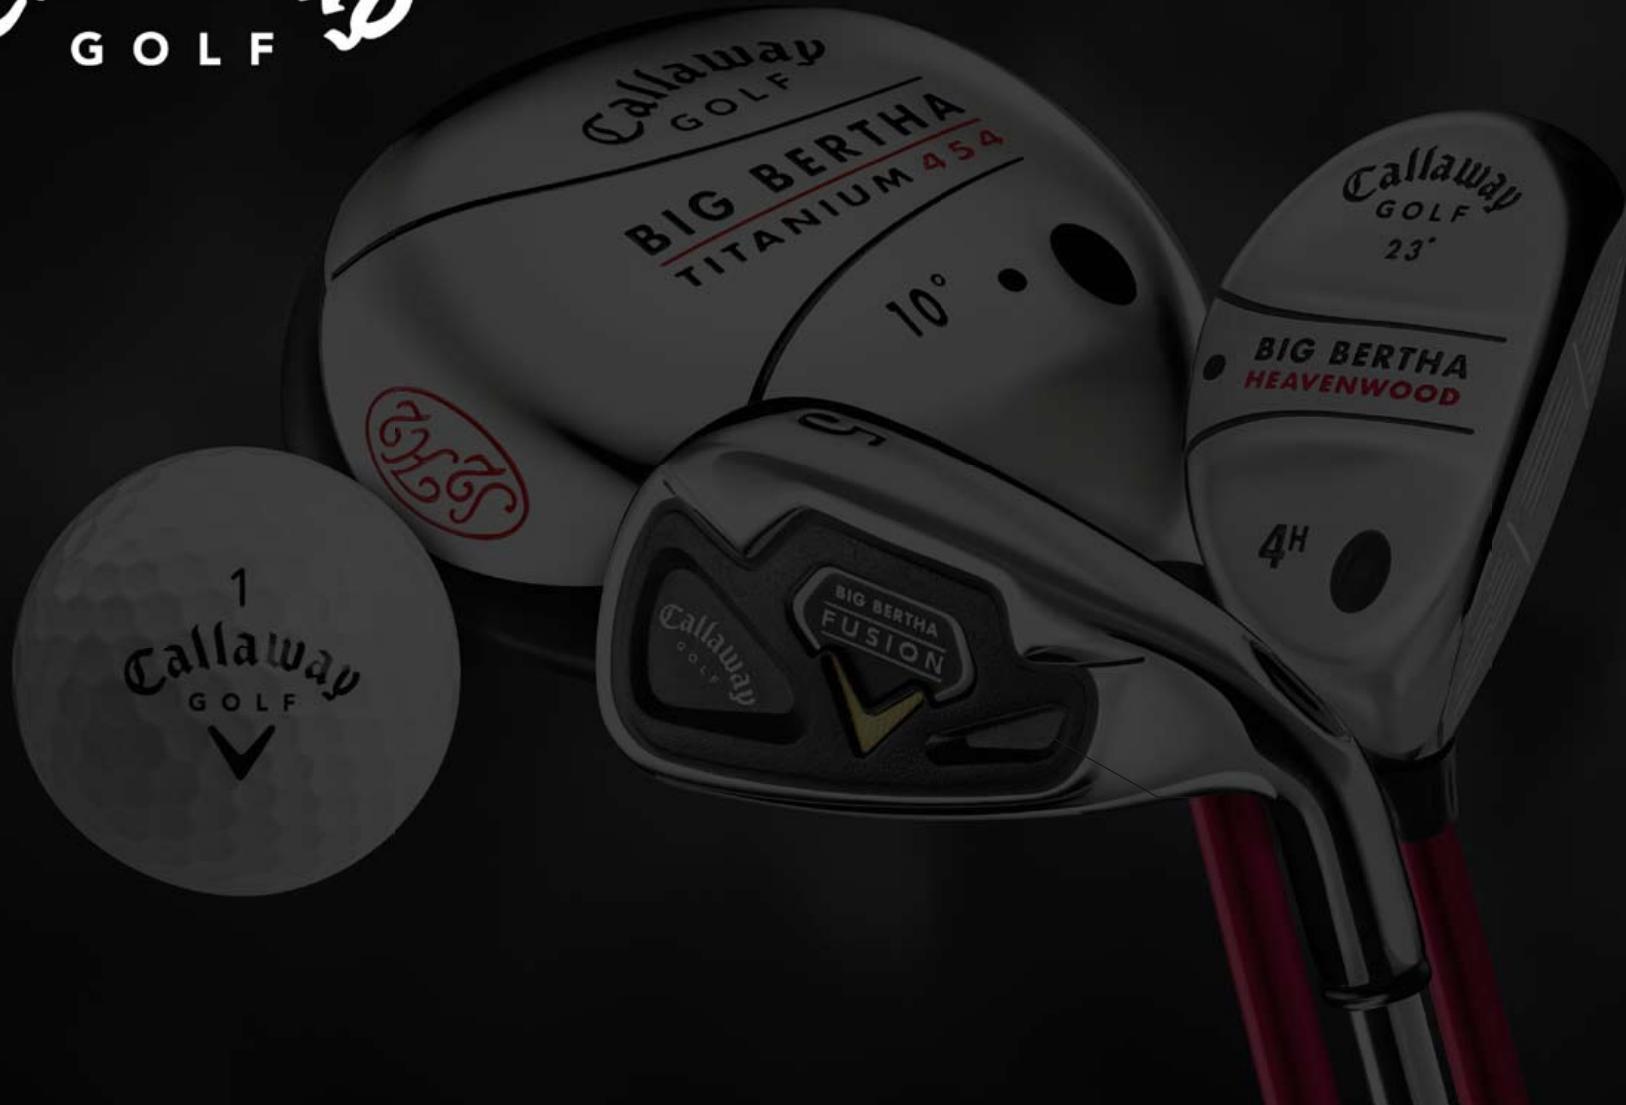

Putter – alignment system helps you line up shots; putt with confidence, consistency and ease.

GES comes with a handy guidebook for an on-course reference. It gives information on which club to use when, along with general distance guidelines. More resources are available at www.callawaygolf.com/ges, where players can join the Game Enjoyment System community and find areas for feedback, learning and more.

Bags and Accessories

Stand Bags

The tradition of walking the course lives on with Callaway Golf's stand bags. Callaway Golf offers a variety of innovative stand bags that are light on weight and heavy on features and storage.

Callaway Golf Stand Bags

The perfect companion for walking the course.

3.8 Ultra Light Stand Bag

For golfers who like to walk the course, this lightweight bag is easy to carry while keeping your clubs in place. Six pockets provide ample storage of personal items, including a hidden pocket for valuables.

STS Stand Bag

You're way out front with a seven-way top, six strategic pockets and an insulated pouch* to stow your beverage.

Daytripper Stand Bag

Nine roomy pockets and the unique Woode® Club Management System make this a great bag for walking or riding.

Ion Stand Bag

An innovative exoskeleton design looks great and helps the Woode® Club Management System keep your clubs from catching inside the bag.

* Zip-off Pocket for custom logo embroidery.

Cart Bags

Having a golf bag with plenty of pockets is hardly helpful if those pockets aren't easily accessible when your bag is strapped to a cart. Every Callaway Golf cart bag is designed with generous, well-positioned pockets that you can actually get into during your round. You'll be glad you have one of these bags along for the ride.

Callaway Golf Cart Bags

Who says you can't take it with you?

Big Bertha Cart Bag

A pair of full-length shaft dividers and seven big pockets help keep your clubs and accessories neatly organized.

ORG. 14 Cart Bag

Featuring a 14-way top, this bag keeps your clubs in place from tee to green. A special insulated cooler pocket allows you to keep water or other beverages chilled, even on the hottest days.

Great Big Bertha Cart Bag

This high-performance bag features an easy-to-use, six-way wishbone top, a hide-away strap pocket, and a futuristic, dual-durometer base.

Women's Traditional Cart Bag

This slim, stylish bag has six pockets - two with fleece lining to protect valuables - with four matching headcovers and a removable valuables pouch.

Country Club Cart Bag

A cart-specific design brings function to this sumptuous bag, which has real leather as one of its luxurious features.

9.5-inch and 10.5-inch Tour Cart Bags

Use the bag our Callaway Golf Staff Professionals around the world use. Featuring an exceptional amount of storage and dual water bottle pockets, this bag has everything you need to play at the highest level.

Headwear

Great performance and innovative designs aren't just for golf clubs and balls. They're also built into Callaway Golf's fashionable family of hats, caps and visors. This is headwear with style to spare, from the golf course to the street. If you're not wearing a Callaway Golf hat, you're just not using your head.

Gloves

You may not think of technology when you think of gloves, but Callaway Golf does. That's why we use X-SPANN Technology to make the connection between your hands and the club as comfortable and effective as possible.

Callaway Golf Gloves

Get a hold on technology.

Pro Series Glove

Pittards leather is combined with X-SPANN material in the last two fingers of the grip for a personalized fit and premium feel. Plus, a newly added seam across the knuckles allows more movement.

Dual Zone Glove

Premium Cabretta leather in the palm, thumb and forefinger provide the softest feel and best grip while synthetic leather in the rest of the glove provides durability and breathability.

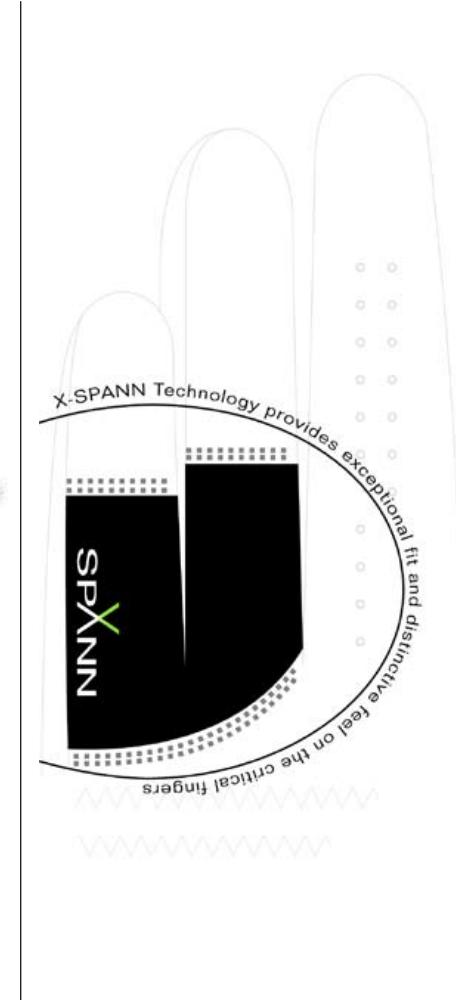

Dawn Patrol Glove

All-weather synthetic leather is augmented by real leather in the palm for extra padding.

New packaging provides greater shelf appeal.

Accessories

Callaway Golf's extensive line of accessories includes high-quality, high-performance products that are excellent additions to any golfer's array of equipment.

Callaway Golf Accessories

Even more ways to help you enjoy the game.

Callaway Golf Headcovers

You don't play just any woods, so why use generic headcovers? Callaway Golf's stylish wood covers are available as a single headcover that fits all of our drivers and fairway woods, or in a three-pack with a driver and two fairway wood headcovers with numbered tabs.

Callaway Golf Towels

These generous 30-inch by 20-inch cotton velour towels will help you keep you and your clubs clean and dry. Available in Black/Blue, Black/Red and Black/Silver.

Callaway Golf Umbrellas

Play through the rain with a Callaway Golf umbrella. Our 62-inch umbrellas are available in single canopy or double canopy configurations. A larger 64-inch double canopy umbrella has a custom-molded handle and has been tested in winds up to 60 miles per hour.

Callaway Golf Hybrid Divot Tool

Everything that carries the Callaway Golf name is designed to be Demonstrably Superior and Pleasingly Different. That includes these sleek, ergonomic tools, right down to the dual-molded rubber grip and a removable, coin-like ball marker.

LIMITED TWO-YEAR WARRANTY

WARRANTY COVERAGE: Callaway Golf Company warrants its golf clubs, components, and other products purchased from an authorized Callaway Golf retailer or distributor to be free of defects in material and workmanship for two years. Callaway Golf will, without charge to the consumer, repair or replace any product or component or part thereof that is defective or becomes defective during normal use within two years after the date of purchase from an authorized Callaway Golf retailer or distributor. At its option, Callaway Golf may replace the product with a new or refurbished product. Callaway Golf does not warrant its products against damage caused by third parties. This warranty does not cover paint scratches, cosmetic blemishes or other normal wear and tear. Callaway Golf will fix such blemishes and scratches, however, for a fee. To obtain warranty service in the United States on a complete Callaway Golf product, return the product to a Callaway Golf authorized retailer or directly to Callaway Golf. In the case of a Callaway Golf component, you must obtain warranty service through an authorized Callaway Golf retailer of that component. Outside of the United States, all warranty service must be obtained from the distributor or subsidiary in the country in which the club was purchased. To determine the Callaway Golf authorized retailer, distributor or subsidiary nearest you, check our website at www.callawaygolf.com or contact Callaway Golf directly. In California, call collect 760-931-1771; outside California call toll-free 1-800-228-2767; Customer Service 1-800-588-9836.

DISCLAIMER: This warranty is in lieu of all other express warranties. Callaway Golf disclaims all warranties for products that are purchased from sellers other than authorized retailers or distributors, including the warranty of merchantability or the warranty of fitness for a particular purpose. Callaway Golf also disclaims any implied warranty, including the warranty of merchantability or the warranty of fitness for a particular purpose, and assumes no responsibility for any special, incidental, or consequential damages as to all products and components. Callaway Golf further disclaims any implied or express warranty of, and assumes no responsibility for, defects in workmanship caused by third parties. This warranty gives the consumer specific legal rights; a consumer may have other rights depending upon where he or she lives. Some jurisdictions do not allow the exclusion or limitation of special, incidental or consequential damages, or limitations on how long a warranty lasts, so the above exclusion and limitations may not apply to everyone. Outside of the United States, local taxes, tariffs or shipping charges may apply.

SAFETY

A golf club can be a dangerous piece of equipment. Users should only swing a club in an area cleared of people and other impediments. Golf club shafts are fragile, whether they are made of graphite or metal. Shafts may break, and broken shafts may cause injury. Shafts should not be abused, and should be inspected periodically to determine if cracking or breaking has occurred. Callaway Golf equipment should not be altered or changed in any way, except for re-gripping, other than at the Company's factory in Carlsbad, California, or other authorized repair center.

GOLF

TRIHOT PUTTERS

Triple the innovation. Triple the confidence. TriHot's ingenious design gets putts rolling more smoothly for accurate distance control. The soft, carbon steel body is CNC-milled and nickel plated for a rich, durable finish. The proprietary tungsten weighting system moves mass away from the face – which eliminates

A technological “roll” model.

- Four-piece construction is Odyssey Golf's most advanced design.
- Soft carbon steel body is 100 percent CNC-milled, then nickel-plated.
- Milled tungsten weight flange moves mass deep and low for accuracy and optimal roll characteristics.
- Stronomic interface layer between the body and flange eliminates vibration.
- White Hot insert is soft and resilient for a combination of smooth feel and distance control.

TriHot #1

Face-balanced mallet with a double-bend shaft and several sight lines for easy alignment.

Lengths: 33", 34", 35", 36"

TriHot #2

Scoop-back blade with a shorter hosel and half-shaft offset. Also available in left-handed model.

Lengths: 33", 34", 35", 36"

TriHot #3

Rounded heel-toe blade with a longer hosel and full-shaft offset.

Lengths: 33", 34", 35", 36"

Tungsten back flange

Carbon steel body and hosel

Stronomic interface layer

2-BALL PUTTERS

Every revolution begins with an idea. A unique, patented alignment system has made 2-ball the world's best-selling putter. Now the 2-ball Putter line has more models and more options than ever before. Just line up the discs – drop your putt. No putter looks like it. No putter performs like it.

The putters that started the alignment revolution.

- Unique 2-ball alignment system improves your aim for better accuracy.
- Extended head design promotes a smooth swing along the target line.
- Low, deep Center of Gravity reduces backspin for a smoother roll.

White Steel 2-Ball

An extended mallet head with the unique 2-ball alignment system designed to help you visualize a line straight to the target. Left-handed model available in early 2005.

Lengths: 33", 34", 35", 36"

White Steel 2-Ball Blade

A sleeker, blade-like head design with a traditional "crank-neck" hosel and unique White Steel insert technology.

Left-handed model available in early 2005.

Lengths: 33", 34", 35", 36"

White Steel 2-Ball Center-Shafted

An extended mallet head with a center shaft and no offset.

Lengths: 33", 34", 35", 36"

2-ball

All-New Anatomic Grip

- Softer material for increased feel
- Tactile surface gives you control without "overgripping"

The putters that started the alignment revolution.

- Unique 2-ball alignment system improves your aim for better accuracy.
- Extended head design promotes a smooth swing along the target line.
- Low, deep Center of Gravity reduces backspin for a smoother roll.

White Hot 2-Ball

An extended mallet head with the unique 2-Ball alignment system designed to help you visualize a line straight to the target. Also available in left-handed model. Lengths: 33", 34", 35", 36"

White Hot 2-Ball Blade

A sleeker, blade-like head design with a traditional "crank-neck" hosel and White Hot insert technology for our softest feel. Also available in left-handed model. Lengths: 33", 34", 35", 36"

White Hot 2-Ball Center-Shafted

An extended mallet head with a center shaft and no offset. Also available in left-handed model. Lengths: 33", 34", 35", 36"

White Hot 2-Ball Long

An extended mallet head with a long shaft and split grip. Also available in left-handed model. Lengths: 46", 48", 50"

White Hot 2-Ball Mid

An extended mallet head with mid-length shaft and extended one-piece grip. Also available in left-handed model. Lengths: 41", 43", 45"

The putters that started the alignment revolution.

2-ball

DFX 2-Ball

An extended mallet with a double-bend shaft and a half-shaft offset. Also available in left-handed model. Lengths: 33", 34", 35", 36"

DFX 2-Ball Blade

A sleeker, blade-like head design with a traditional "crank-neck" hosel and a rich, dark finish, plus Stronomic insert technology for a solid feel. Also available in left-handed model. Lengths: 33", 34", 35", 36"

DFX 2-Ball Center-Shafted

WHITE STEEL PUTTERS

The precision of milled steel. The feel of urethane. The best of both worlds has arrived. Introducing the new White Steel Putter — the next level of insert technology. By placing milled steel inside our world-famous urethane insert, we've created a dual insert technology with a single goal — sink more putts.

White Steel #1

White Steel #2

White Steel #5

Feel meets steel.

- Dual Insert Technology provides seamless integration in a precision-milled, stainless steel trapezoid insert suspended in a Modified White Hot urethane insert.
- Modified White Hot Urethane Insert is lightweight and highly resilient; allows weight to be repositioned deep in the putterhead for greater resistance to twisting and increased stability on off-center putts with incredibly soft feel.
- Milled Stainless Steel Insert is machine-milled for a consistent, flat surface with improved roll and a unique, pleasing sound.
- Highlighted alignment strip has a satin finish on the topline that helps square the face to the target at address and focuses sight for a pure stroke.
- New Odyssey Red Swirl Grip with secure, soft feel makes a bold statement on the green; produced by Winn in a soft polymer compound.

White Steel #1

Heel-toe weighted blade with a full-shaft offset. Left-handed model available in early 2005. Lengths: 33", 34", 35", 36"

White Steel #2

Scoop-back blade with a half-shaft offset.
Lengths: 33", 34", 35", 36"

White Steel #5

Face-balanced mallet with a double-bend shaft and a full-shaft offset. Left-handed model available in early 2005.
Lengths: 33", 34", 35", 36"

WHITE STEEL

Body

- Satin finish focuses attention to center of putter
- Enhanced alignment lines assist in "squaring up" the putter

Tour-proven White Hot Insert

- Enhanced distance control
- Removes mass from the face to increase forgiveness
- Soft yet resilient

All-New Anatomic Grip

- Softer material for increased feel
- Tactile surface gives you control without "overgripping"

WHITE HOT PUTTERS

What do a special blend of urethane, a soft, resilient feel and a consistent rebound feel like? Confidence. For the last four years, Odyssey White Hot Putters have been among the most popular putters on tour and with amateurs around the world. Golfers love the soft feel and unbelievable soft touch of the White Hot insert. Plus, a variety of head styles give you the edge to even the score.

Inserts with a soft feel and solid performance.

WHITE HOT

- Urethane insert material provides soft feel with any type of golf ball.
- Lightweight insert moves mass away from the center of the putter for improved perimeter weighting.
- The White Hot insert has consistent rebound properties, enhancing distance control on long and short putts.
- Glass-beaded finish is graceful and durable.

White Hot Rossie

Heel-toe weighted blade with a full-shaft offset. Left-handed model available in early 2005. Lengths: 33", 34", 35", 36"

White Hot #1

Heel-toe weighted blade with a full-shaft offset. Left-handed Heel-toe-weighted blade with a full-shaft offset. Also available in left-handed model. Lengths: 33", 34", 35", 36"

White Hot #2

Scoop-back blade with a full-shaft offset. Lengths: 33", 34", 35", 36"

White Hot #2 Center-Shafted

Scoop-back blade with a non-offset center shaft. Also available in left-handed model. Lengths: 33", 34", 35", 36"

White Hot #4

Heel-toe-weighted semi-mallet with full-shaft offset. Lengths: 33", 34", 35", 36"

Inserts with a soft feel and solid performance.

DFX PUTTERS

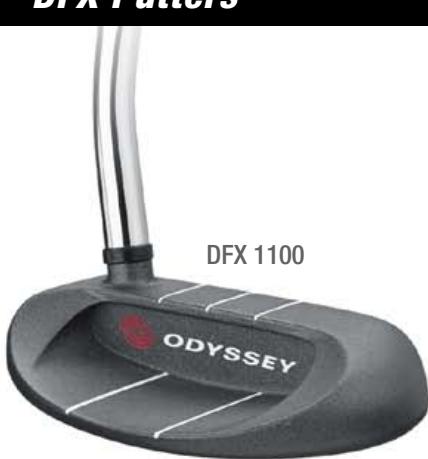

It looks wicked because it is. Improved Stronomic Technology gives the DFX series consistent performance with a slightly firmer feel than White Hot Putters. The sleek design is based on the preferences of tour pros who rely on Odyssey putters. Make a statement on the green without saying a word.

The new face of Stronomic Technology.

- Lightweight Stronomic insert provides firm feel and increases perimeter weighting and forgiveness.
- Durable, dark finish reduces glare and gives each putter a rich look.
- DFX head styles are based on feedback from the many tour professionals who use Odyssey putters.

DUAL FORCE PUTTERS

The science of Odyssey prevails with the putters that started the insert phenomenon in 1994. Standing the test of time, Odyssey Dual Force Putters continue to cash the big checks at tour events a decade later.

Celebrating 10 years of tour victories.**DUAL FORCE**

- Original black Strononic insert is softer than traditional stainless steel putters.
- The face of each Dual Force model is milled for precision and consistency.
- Odyssey Dual Force Putters have been used to win more than 250 tour events.

LIMITED TWO-YEAR WARRANTY

WARRANTY COVERAGE: Callaway Golf Company warrants its golf clubs, components, and other products purchased from an authorized Callaway Golf retailer or distributor to be free of defects in material and workmanship for two years. Callaway Golf will, without charge to the consumer, repair or replace any product or component or part thereof that is defective or becomes defective during normal use within two years after date of purchase from an authorized Callaway Golf retailer or distributor. At its option, Callaway Golf may replace the product with a new or refurbished product. Callaway Golf does not warrant its products against damage caused by third parties. This warranty does not cover paint scratches, cosmetic blemishes or other normal wear or tear. Callaway Golf will fix such blemishes and scratches, however, for a fee. To obtain warranty service in the United States on a completed Callaway Golf product, return the product to a Callaway Golf authorized retailer or directly to Callaway Golf. In the case of a Callaway Golf component, you must obtain warranty service through an authorized Callaway Golf retailer of that component. Outside of the United States, all warranty service must be obtained from the distributor or subsidiary in the country in which the club was purchased. To determine the Callaway Golf authorized retailer, distributor or subsidiary nearest you, check our website at www.callawaygolf.com or contact Callaway Golf directly. In California, call collect 1-760-931-1771; outside California call toll-free 1-800-228-2767; Customer Service 1-800-588-9836.
