WORKS
FOR YOU

GMC

HUMMER

Dear Fleet Customer:

General Motors of Canada has always offered you the largest, most comprehensive lineup of fleet vehicles. With our more extensive range to choose from, you can better match a vehicle to your job requirements and your budget. This year that's even more so. We're introducing a host of new vehicles. We've also made many meaningful revisions to our familiar nameplates. Plus the GM line of alternate and hybrid fuel vehicles has also grown. As a result, you have an even wider selection of cars, trucks and crossover vehicles to choose from. GM's greater selection works for you. Here is just a hint of what's new:

Meet GM's first mid-size pickups – Chevy Colorado and GMC Canyon.

Here's all the rugged reliability, task-taming capability and comfort the Chevy and GMC nameplates are famous for – in a handy new size. Plus you can have it in Regular, Extended and Crew Cab models. Power? Both offer a muscular 175-horsepower Vortec I-4 engine or a revolutionary new Vortec I-5-cylinder engine that churns out 220 hard-workin' horses. Size 'em up. You might just find that mid-size is the perfect fit for you.

2004 Malibu. All new from road to roof. Plus there's a new Malibu Maxx.

The latest generation of Malibu breaks exciting new ground with innovative new features like power adjustable pedals, remote starting and a new 3500 V6 with 200 horsepower. But the new Malibu doesn't break with the award-winning quality and value established by its predecessors. Malibu Maxx takes all of those attributes and adds its own unique styling and incredible new versatility.

2004 Grand Prix. More power, handling and comfort in your personal pace car.

This is what the sport sedan was meant to be. Sleek. Refined. And above all, exhilarating to drive. Grand Prix GTP delivers on all of the above starting with a supercharged 3800 Series III V6 that's rated at 260-horsepower. But whichever 2004 Grand Prix model you choose – GT1, GT2 or GTP – you'll quickly find that this is one car that's designed for drivers. The passengers are just along for the ride – and what a ride it is. A bigger, better selection is just one way GM Fleet works for you. Our dedicated national fleet team also support you with their extensive knowledge, experience and unwavering commitment to the highest level of customer service. We invite you to contact us at: 1-800-866-0313 or fcc@gmfleetcommand.com.

Sincerely,

B.E. (Blair) Upton

Director – Fleet and Commercial Sales

FLEET WEB SITE

**For the latest Fleet info,
click www.fleet.gmcanada.com**

Making the right decision for your fleet operation requires the right information – right now. The GM Fleet Web site puts you in touch with the latest updates on model specifications and fleet programs as well as contact names, phone numbers and e-mail addresses. Information on this site is updated on an “as-required” basis. So you’ll always have the up-to-date facts for your decision making.

Since it was launched in 1999, the GM Fleet Web site has been expanded to cover everything from information on how to qualify as a fleet customer, key GM Fleet personnel, GM Dealer Fleet Managers to a listing of GM Medium-Duty Truck Dealers. The site gives you a direct e-mail connection for requesting product information, brochures, program details, or specific details concerning your fleet operations. You will receive our prompt response via return e-mail.

We also invite you to visit the News & Views section of the site for current details on new product introductions, upcoming

events, meetings and auto shows. Plus, we've designed the site so that you can link to a number of other GM Web sites such as: GM Mobility, Alternative Fuels, GM Protection Plan Programs, GM TOTAL™ Warranty, GM SmartLease, GM Goodwrench Service, GM Roadside Assistance, OnStar and GMAC.

Your fleet decisions can only be as good as the information they're based on. The GM Fleet Web site is dedicated to providing you with the information you need – quick as a click.

Why OnStar?

OnStar saves your company time **and** money.

OnStar Helps Increase Employee Value, Satisfaction and Retention

OnStar offers many key safety features such as hands-free wireless communication*, automatic notification of air bag deployment, accident assistance and emergency services – all to keep your employees safe and sound.

OnStar Helps Lower Your Operating Costs

OnStar protects your valuable fleet and commercial investment by lowering operating costs. It can assist authorities in locating stolen vehicles. To make it easy, the cost of OnStar can be included on the vehicle factory invoice.

OnStar Helps Increase Productivity and Revenue

OnStar supports your employees so they are at peak performance. They have immediate access to all kinds of information – from a host of convenience services including banks, hotels and restaurants to directions to the nearest gas station. It's a cost-effective solution for your employees so they can stay safe and productive.

NEW! OnStar Personal Calling

There's nothing more convenient than making calls from the road. With OnStar Personal Calling nationwide wireless phone service you can safely make and receive hands-free, voice-activated calls. It has better connectivity in areas of limited cellphone reception and it's there for you just in case your cellphone is forgotten or your battery is not charged. Just press the white dot button, state a phone number or preprogrammed name and you're connected. Your voice does the work so you can keep your hands on the wheel and your eyes on the road.

OnStar Fleet and Commercial Service Plans

visit us at onstarcanada.com
Or call OnStar Fleet and Commercial Operations
at 248-588-6492 or 248-588-4624

OnStar is featured on many General Motors vehicles. Please see the individual vehicle pages in this brochure for specific availability.

* Available in most markets. OnStar Personal Calling requires a subscription to one of the OnStar service plans. Requires an OnStar Personal Calling-enabled vehicle, and an existing OnStar service contract with prepaid calling minutes. OnStar voice recognition system may not work with all voices. OnStar services require vehicle electrical system and analogue wireless service to be available and operating for features to function properly. OnStar uses existing emergency service providers as well as wireless and satellite technologies. Call 1-800-ONSTAR-7 or visit onstarcanada.com for system information and details. **A two-year minimum service plan is required and must be included at the time the vehicle is ordered. †Does not include reservations.

ALTERNATIVE FUELS

GM continues to focus its extensive technological resources on protecting the environment and reducing our dependence for foreign oil.

This year, over a dozen of our nameplates are available as bi-fuel hybrid models that run on both Compressed Natural Gas (CNG) and gasoline. We also offer dedicated alternative fuel vehicles that run on CNG, and flexible fuel models that operate efficiently on any combination of gasoline and Ethanol E85.

In 2005, GM will begin production of a Saturn VUE hybrid gasoline/electric motor model which will increase composite city/highway fuel efficiency by 50%. Looking further down the road, GM innovations such as Displacement On Demand that lets the engine run on half its cylinders until full power is required and the VTi variable transmission will greatly increase fuel efficiency while reducing emissions. Models that utilize fuel cells cut exhaust emissions to nothing more than harmless water vapor.

At GM, technology and commitment are driving us towards an even brighter future.

GM re-invents the automobile with Hy-Wire.

GM's Hy-Wire is the world's first drivable vehicle to combine a hydrogen fuel cell with by-wire control technology. Gone are the conventional engine and mechanical steering systems. In fact, everything required to power and control the vehicle is contained in a chassis that is just 279 mm (11") thick and tapers to just 229 mm (9") at the outside edge – sort of like a skateboard. It's all electric – so, aside from water vapor, it's emission free. This unique combination also allows remarkable freedom in designing the vehicle. Hy-Wire's hydrogen fuel cell results in 94 kilowatts of power – enough to propel it at speeds near 160 km/h.

Hy-Wire is the product of GM's immense global resources. Completed in just 8 months, it involved engineers and designers in the US, Germany, Sweden and Italy. It is also a significant step forward in GM's goal of having affordable fuel cell vehicles on the road by the end of this decade.

ALTERNATIVE FUELS

Hybrids bridge the gap between gas tanks and fuel cells.

A growing number of GM's more popular vehicles have been engineered to operate on both Compressed Natural Gas (CNG) and gasoline. But this is just the beginning. Future hybrid models will be available with a combination of gasoline power and electrical motor assist. The same motivational duo will also be available on the 2006 Equinox and 2007 Malibu sedan along with GM's VTi variable transmission.

A variant on the hybrid theme is GM's Displacement On Demand engine. Rather than switching between fuel sources or complementing one power source with another, DOD lets the engine run on half its cylinders under normal operation, then cuts in the rest of its cylinders when maximum power is required. Thus, a V8 can cruise comfortably and economically on 4 cylinders, then switch to 8 when extra acceleration or towing power is needed.

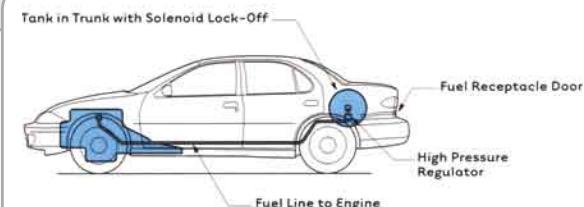

The roomy, stylish way to reduce

Reduced fuel consumption cuts emissions while bolstering your company's bottom line. Cavalier's proven ECOTEC engine is designed to wring the most distance out of a litre of fuel possible – CNG or gasoline.

When the CNG tank is empty, the system automatically switches to gasoline. So driving range is never a problem.

Like all GM bi-fuel CNG models, it's built to our strictest specifications for storage and handling. Looking for a stylish, roomy, well-equipped sedan that'll also cut costs and emissions? Look to the 2004 Cavalier.

Range: CNG – 257.4 km (160 miles)*
Gasoline – 643.6 km (400 miles)*

Base Curb Weight: 1355kg (2,988 lbs.)

Engine: 2.2L L4 L42

Emissions: LEV, Canada & 50 states

Option Code: KL6 Bi-fuel CNG

*Depending on driving conditions.

ALTERNATIVE FUELS

Ethanol E85 - the flexible way to reduced emissions.

When Ethanol is blended with conventional gasoline, exhaust emissions are reduced. But that's only part of this environmentally-friendly story.

Ethanol can be produced from renewable resources like feedstocks and plant life such as sugar cane. So we needn't be concerned about running out of our supply in the near future. Plus, blending it with gasoline also helps stretch current oil supplies.

GM's Ethanol E85 vehicles are designed to operate efficiently on any blend ratio of Ethanol or gasoline. So drive wherever you please, availability is never a problem.

The Ethanol E85 alternative may be ordered on all 2004 Chevy Tahoe/Suburban and GMC Yukon/Yukon XL models with the Vortec 5300 engine. It may also be ordered on Chevrolet Silverado and GMC Sierra with the Vortec 5300 engine.

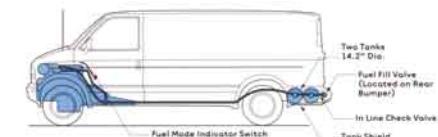

Dedicated CNG or Bi-Fuel, the choice is yours.

Chevy Express and GMC Savana are two hard-working commercial vehicles that let you have things your way when it comes to a lot of things – including the fuel supply.

Dedicated Compressed Natural Gas models are available for tackling tasks in areas where CNG is widely available. If it isn't always near by, the bi-fuel CNG models can still deliver the reduced emission benefits of CNG along with the secure availability of gasoline. And there's no fuss or muss. The bi-fuel CNG models automatically switch from CNG to gasoline when the CNG tank is empty.

Which ever you choose, rest assured that the storage and handling systems have been engineered and build to GM's highest standards.

Range: CNG – Bi-Fuel 160.9 km (100 miles)*
– Dedicated 402 km (250 miles)*
Gasoline- 643.6 km (400 miles)*

GVW: Panel – 3856 - 4355kg
(8,500 - 9,600lbs.)
Cutaway- 5443 or 5579kg
(12,000 - 12,300lbs.)

Wheelbase: Panel – 135" and 155"
Cutaway- 139" and 159"

Engine: Vortec 6000 V8

Emissions: ULEV, Canada & 50 states

Option Code: KL8 Dedicated CNG/KL6 Bi-Fuel CNG

*Depending on driving conditions.

SPECIALTY VEHICLES

In an emergency you need action, not excuses.

Here's a strong, versatile chassis you can count on. It's the medium-duty 560 chassis and its available GVWRs range from 16,000 lbs. to 19,500. Choose 1 of 4 powerplants from the 225-horsepower Vortec 8100 gasoline V8 right up to our Duramax Diesel 6600 V8 that checks in with 300 horsepower and 520 lb.-ft. of torque at just 1800 rpm. Plus they all come with heavy-duty electrical and cooling systems. When reliability counts, count on these tough guys.

School bus chassis that gets top marks.

With GVWRs that range from 12,000 to 19,500 lbs. and engine choices that include both gasoline and diesel, there's a GM chassis that can handle just about any class load. And if small is your call, we've got short wheelbase models that are great for handling downtown traffic.

Impala has a police record – and it's all good.

Impala's police package has everything you and your force need. Its heavy-duty cooling, electrical and suspension systems keep it on the job, 'round the clock. Inside, there's room for six good guys. And its 478-litre (17.6 cu. ft.) trunk was made for emergency gear – lots of it. The Impala Police Package. Built like someone's life depended on it.

Adaptability means ability.

We offer a wide range of vehicles that can be outfitted with MANY different types of adaptive equipment. That's why we suggest that you have a driver assessment performed to determine just what vehicle and equipment is needed. Once that's nailed down, an experienced installer should be engaged and the vehicle's operator given thorough instruction on maintaining the equipment. Call 1-800-DRIVE for further details.

Dignity and elegance for all occasions.

Cadillac Coach is both elegant and refined with features like wide-swing rear doors for graceful loading and unloading. The 6-door limousine with its extra seating capacity makes an excellent choice for special occasions. Both feature Cadillac's NorthStar System and are built by Master Coachbuilders.

NEW PRODUCTS

2005 Chevy Equinox

Sometimes big is too big and small is, well, not big enough. That's where Chevy Equinox fits in. It's compact, but not too compact. Powered by Chevy's famed 3400 V6, Equinox can more than handle tough terrain and your hauling needs. Plus you and yours will enjoy a surprising number of conveniences, a smooth ride, and nimble handling. Equinox also comes with a healthy dose of innovative thinking. Like the height-adjustable cargo shelf that also doubles as a security cover and the sliding rear seat that adapts quickly and easily to either passengers or cargo. Chevy Equinox – everything about it was engineered to fit your lifestyle.

Cadillac XLR

Meet XLR – everything Cadillac is famous for in a sporty, ultra-luxurious roadster. Its sleek lines reflect Cadillac's trademark styling and instantly announce this two-seater's pedigree. Its interior is crafted with supple leather, brushed aluminum and polished eucalyptus wood. Bvlgari designed the jewel-like gauges.

The hard top stows beneath the rear deck at the touch of a button. Its next generation Northstar V8 features variable valve timing for near endless power. Magnetic Ride Control instantly tailors the damping to match the road conditions. It even senses when you're close to it – via the key fob – and automatically unlocks the doors. Cadillac XLR – available in limited numbers for a fortunate few.

Chevy SSR

Ready for a glimpse straight into the soul of Chevrolet? You're looking at it, in all its glory. This two-seater open-air roadster resembles nothing else on the road. It embodies everything Chevrolet represents, today and into the future. Introducing the Chevy SSR – short for Super Sport Roadster. It blends fantasy styling with real world cutting-edge technology to produce a sensation that is certain to capture your imagination. The SSR puts it all together: from its powerful V8 for inspiring performance, to its innovative retractable hardtop roof for an uncompromised top-up or top-down driving experience. Prepared for an authentic expression not just of Chevrolet but of yourself? Then you're ready for the Chevy SSR. Coming in the summer, 2003.

CONCEPT VEHICLES

Chevrolet SS

It's a family sedan – in the fast lane. On one hand, Chevrolet SS has looks that'll thrill. And on the other, its driver-oriented interior also has room for five. Under its hood is a contemporary version of Chevrolet's classic small block V8 that pumps out 430 horsepower. To deliver that power to the road the SS comes with 21-inch front and 22-inch rear aluminum wheels. Its suspension is calibrated for performance. The shocks are driver adjustable, so you can optimize ride or handling, or select a blend of both. And to complete the performance package, this rear-wheel drive comes with 14-inch rotors on the front brakes and 14.75-inch rotors on the rear.

Chevrolet SS – the contemporary evolution of a classic Chevrolet performance legend.

Cheyenne

Cheyenne explores new concepts like a cargo box with side doors in addition to the rear cargo gate. Storage compartments are built into the bed floor and handy drawers are located in the box side panels. Cargo-area lighting is built in for work at night. And for easy loading the cargo box floor is just 28 inches high.

Inside, Cheyenne features luxuries befitting a premium-level sedan. Under its clamshell hood is a supercharged 6.0 litre V8 engine that generates 580 lbs.-ft. of torque. It is also adaptable to GM's Displacement On Demand technology that shuts down half of the cylinders during most driving conditions, then activates them when brisk acceleration or load hauling are required.

Chevrolet Cheyenne – the full-sized pickup of tomorrow.

Buick Centieme

Is it the evolution of the SUV or the reinvention of the luxury family sedan? Buick Centieme has

Versatrak all-wheel drive, nimble, energetic styling and massive 22-inch aluminum wheels. Then again, it carries up to six passengers via three rows of two-by-two seating. There is an abundance of luxury sedan features and thoughtful touches. The third-row seat folds up and down into the floor at the touch of a button and the consoles for the front and middle rows can be moved for passenger pass-through.

Perhaps Buick Centieme's personality depends mostly on where you're headed. And no matter where that may be, its twin turbocharged V6 will take you there with the smooth, reliable performance that is a Buick tradition.

CONCEPT VEHICLES

Pontiac G6

Pontiac G6 takes to the road with clean, athletic lines and a ground-hugging stance

that sets the trend for Pontiacs to come. It also sets a new level of Pontiac performance with a supercharged 285-horsepower V6 engine featuring Displacement on Demand technology for outstanding fuel economy. Its sleek fibreglass body is stretched over 20-inch billet wheels that are connected to a four-wheel independent suspension system incorporating adjustable ride height and handling to tackle the turns with ease. Add the sporty shifting of its tap-up/tap-down 4-speed automatic transmission, and the G6 is definitely built for drivers – and three very lucky passengers.

Pontiac G6 – total performance in a world-class touring sedan for the 21st century.

Cadillac Sixteen

This is the modern interpretation of everything that made Cadillac the automotive

standard of the world. Beneath that long, classic hood is a V16 engine with Displacement on Demand technology. Under normal driving conditions the engine runs on 8 cylinders. But when the driver demands more, all 16 cylinders blend to deliver 1000 horsepower.

In keeping with its classic tradition, Cadillac Sixteen features nothing less than the finest materials. Body panels are crafted from aluminum. The interior is a sophisticated blend of walnut burl veneer inlays and hand-stitched Tuscany leather with hand-woven silk carpets for the floor. Absolutely no convenience or technological advance has been overlooked to make Cadillac Sixteen the premier ultra luxury vehicle of the 21st century.

Saturn Sky

Here's a versatile roadster that has room for lots of friends or a small mountain of gear. Basic

seating is for two. But two rear seats are stored beneath the rear tonneau cover. Handy storage compartments abound. For unobstructed pass-through, the gear shifter folds into the centre console when the vehicle is parked.

Saturn Sky also combines frugality and fun with a 180-horsepower supercharged 2.2 litre 4-cylinder engine that's coupled to a 5-speed manual transmission.

As unique as its upswept looks, is the Saturn Sky lighting system. It uses LED's so the driving lights draw less power and are less likely to glare. Even the Saturn badge glows red when the car is running.

Saturn Sky – friendly, functional, frugal, and fun.

NEW FOR 2004

All New Model for General Motors

Available in Hatchback or Sedan Model

105hp 1.6L DOHC 16V L4

2 Standard 12-V outlets

Standard Fog Lights (Hatchback)

5-Speed Manual Transmission

Tilt-Wheel Adjustable Steering Column

SELECTED STANDARD FEATURES

SAFETY AND SECURITY

Dual frontal air bags
Brake/transmission shift interlock (automatic transmission)
Child-security rear door locks
Daytime Running Lights w/ warning on system
Front shoulder, height-adjustable safety belts
LATCH (Lower Anchors and top Tethers for Children), rear seats
Manual trunk entrapment release handle
Engine immobilizer
Seat belts w/automatic pre-tensioners

MECHANICAL

1.6L DOHC 16-valve L4 (105 hp)
5-speed manual transmission
Power, front disc/rear drum
Front independent/rear semi-independent suspension
Power rack-and-pinion steering

Custom cloth reclining bucket seats (Impala)
Driver Information and Convenience Centre (std. LS/SS)
OnStar with one-year Safe & Sound Plan

* Includes full-function traction control and tire inflation monitoring system

CHEVROLET IMPALA

You enjoy an automobile that's shaped to slice smoothly through the wind for improved fuel efficiency. It also pays off with a quieter passenger compartment.

The new Impala SS model elevates handling and performance to a level its predecessor scarcely dreamed possible. All while maintaining amazingly civilized ride qualities.

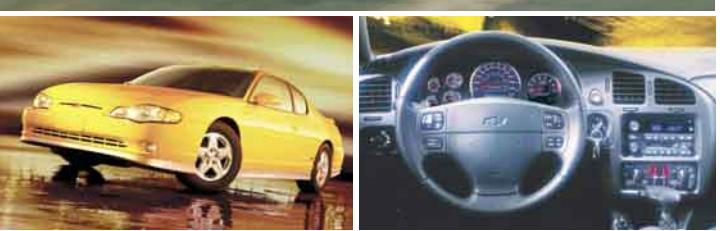

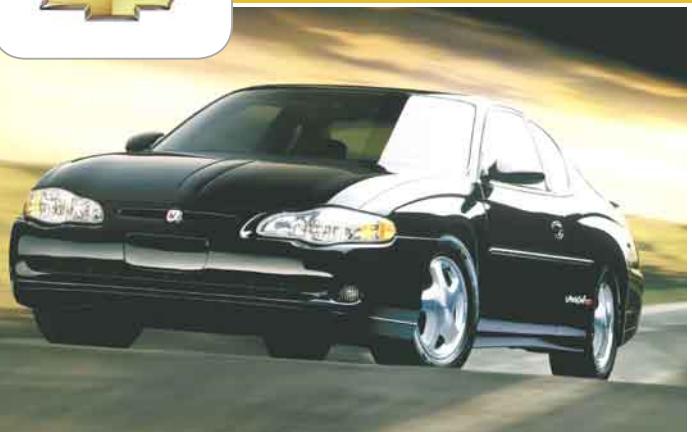

The Impala SS features a state-of-the-art supercharger that boosts the renowned 3800 Series II V6 to 240 horsepower. It also delivers 280 lb.-ft. of torque for plenty of low-end punch.

Impala is big on people. Thanks to RoomFirst™ design, Impala is bigger inside than its trim exterior would seem to allow.

ASSEMBLY PLANT: Wentzville, Missouri

NEW FOR 2004

The C5500 Kodiak and Topkicks now offer GVWRs all the way up to 11,794 kg (26,000 lb.). Ratings of 9980 kg (22,000 lb.) and over, utilize a higher capacity 3629 kg (8,000 lb.) front axle. In the rear, the 9980 kg (22,000 lb.) GVWR have a 6804 kg (15,000 lb.) rear axle; the 10,886 kg (24,000 lb.) and 11,794 kg (26,000 lb.) GVWRs have 8618 kg (19,000 lb.) rear axles.

MODELS

C4500
 - Regular Cab C4C042
 - Crew Cab C4E042
 - Motor Home Cutaway C4U042
 - Commercial Cutaway C4V042

GVWR: 7258 kg (16,000 lb.)- 7938 kg (17,500 lb.)

C5500
 - Regular Cab C5C042
 - Crew Cab C5E042
 - Motor Home Cutaway C5U042
 - Commercial Cutaway C5V042

GVWR: 8845 kg (19,500 lb.)- 11,794 kg (26,000 lb.)

SELECTED FEATURES

OVERVIEW

These 2004 Kodiak and TopKick models are true Medium Duty Trucks, built to fit the lighter end of the medium duty range, not Light Duty trucks adapted to this market. Built from the ground up to meet the needs of a wide range of jobs, these trucks feature exceptional visibility, manoeuvrability, and powertrains that are second to none.

VORTEC 8100MD V8 GAS

MD stands for Medium Duty and that's an accurate designation for the Vortec 8100. Horsepower and torque outputs are set for medium duty usage. 91% of maximum torque is available at 1600

rpm, and the torque curve is exceptionally flat to ensure maximum capability in getting a load moving and keeping it moving.

2 Versions

Standard

225 hp @ 3600 rpm

350 lb. ft. torque @ 1200 rpm

Available

325 hp @ 4000 rpm

450 lb. ft. torque @ 2800 rpm

DURAMAX 6600 DIESEL

The available Duramax 6600 sets the benchmark for diesel engines in the Class 4 and 5 markets. Jointly engineered by GM and Isuzu, this engine provides exceptional power, durability and performance,

along with being one of the most technologically advanced and "quiet" diesels on the road today. The engine is manufactured in Moraine, Ohio.

2 Versions Available

210 hp @ 2750 rpm

520 lb. ft. torque @ 1800 rpm

300 hp @ 3000 rpm

520 lb. ft. torque @ 1800 rpm

TRANSMISSIONS

The electronically-controlled Allison 1000 series automatic 5-speed transmission is standard for both the C4500 and C5500s. Long-life Dexron III or available synthetic transmission fluid and a spin-on type oil filter help keep operating costs under control. An easy-shifting ZF 6-speed manual transmission featuring a deep low and overdrive is available.

SAFETY

4-wheel disc brakes with a 4-channel anti-lock brake system (ABS) reduce stopping distances and help the driver maintain steering control under extreme braking conditions – even on most slippery surfaces. Air bags are available for the driver or driver and passenger.

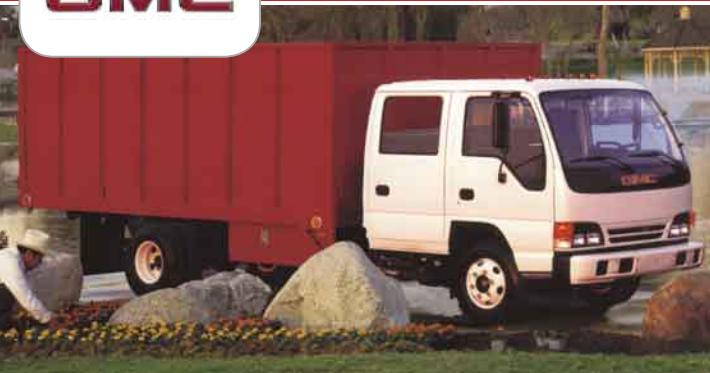

VOCATIONAL PACKAGES

Special packages are available for specific applications such as:

- Wrecker
- Snow Plow
- Fire and Rescue
- Ambulance
- Shuttle Bus and School Bus

NEW FOR 2004

REGULAR CABS

W3500 Models – GVWR 5,443 kg (12,000 lb.)* provides body/payload allowance up to 3,048 kg (6,720 lb.)*

W4500 Models – GVWR 6,577 kg (14,500 lb.)* provides body/payload allowance up to 4,177 kg (9,208 lb.)*

W5500 Models – GVWR 8,142 kg (17,950 lb.)* provides body/payload allowance up to 5,434 kg (11,980 lb.)*

CREW CABS

W4500 Models – GVWR 6,577 kg (14,500 lb.)* provides body/payload allowance up to 3,827 kg (8,437 lb.)*

W5500 Models – GVWR 8,142 kg (17,950 lb.)* provides body/payload allowance up to 5,126 kg (11,300 lb.)*

*Body/payload allowance is the combined weight of body, equipment, payload and occupants.

SPECIFICATIONS

MODEL	WHEELBASE cm (in.)	CAB TO AXLE cm (in.)	BODY LENGTH† m (ft)
Regular Cab	277 (209.0)	225 (88.4)	3.7 (12)
	337 (132.5)	284 (111.9)	4.3 (14)
	381 (150.0)	329 (129.4)	4.9-5.5 (16-18)
	447 (176.0)	395 (155.4)	5.5-6.1 (18-20)
Crew Cab	381 (150.0)	226 (88.9)	3.7 (12)
	447 (176.0)	292 (114.9)	4.9 (16)

†Recommended body lengths do not include accessories, lift gates or refrigerated units. An accurate weight distribution calculation is required, especially with the use of a 20' body.

SELECTED FEATURES

ENGINES

An Isuzu turbocharged and intercooled diesel, model 4 HE1-TC, is used in all models. This four cylinder engine has a displacement of 4.75L (290.0 cu.in.). When used with a manual transmission in W3500 and W4500 models it produces 142 horsepower @ 2,800 rpm and 275 lb. ft. of torque @ 1,300 rpm. With an automatic transmission in W3500 and W4500 models, and either transmission in the W5500, it produces 175 horsepower @ 2,700 rpm and 347 lb. ft. of torque @ 2,000 rpm. Glow plugs ensure quick cold weather starting. Precise control of the timing and fuel injection rate provides optimum economy with low emissions.

TRANSMISSIONS

A 5-speed manual transmission is standard in W3500 and W4500 models. Easy synchromesh shifting is provided for all forward speeds. A 6-speed manual transmission with overdrive is standard in W5500 models. All models are available with an AISIN 450-43LE automatic transmission. It features overdrive and torque converter

lock-up in 2nd, 3rd and 4th gears for excellent fuel economy.

FRONT AXLES

All models utilize an I-Beam front axle rated at 3,098 kg (6,830 lb.) with a stabilizer bar. Kingpins rotate in ball bearings, not bushings, for long life and ease of turning. Multi-leaf springs rated at 2,431 kg (5,360 lb.) are used on W3500 and W4500 models. Front springs on W5500 models have a capacity of 3,828 kg (8,440 lb.).

REAR AXLES

All models have a single-speed rear axle with a banjo-type housing and long-life tapered roller wheel bearings. W3500 and W4500 models have an axle capacity of 4,999 kg (11,020 lb.). W5500 models have a higher capacity 6,600 kg (14,550 lb.) rear axle. Semi-elliptical multi-leaf springs and shock absorbers provide strength for handling loads while improving ride characteristics.

FRAME

All models feature a ladder-type frame fabricated from super strong 44,000 psi yield strength steel for load-carrying capability with light weight. A Section Modulus of 7.2 cu. in. provides a Resistance Bending Moment (RBM) of 316,800 lb.-ft/in. on Regular Cab models. Crew Cabs have a section Modulus of 11.89 cu. in. for a RBM of 523,160 lb.-ft/in. Straight, flat side rails facilitate body installation.

BRAKES

Front discs and self-adjusting rear drums with a 4-channel anti-lock braking system (ABS) for safe, sure stops are used. A vacuum booster assists W3500 and W4500 models while the brakes on W5500 models are hydraulic boosted. A vacuum operated exhaust brake, on most models, prolongs the life of the service brakes.

CAB EXTERIOR

The tilt-cab design provides easy engine access for service. Most routine maintenance checks can be made with the cab in place. The low-cab-forward design contributes to improved manoeuvrability, maximum body length, excellent visibility and easy entry for both driver and passengers. The aerodynamic shape of the cab contributes to overall fuel economy. The cab's unified structure eliminates seams and crevices. Extensive anti-corrosion protection ensures its long life, maintaining its value.

CAB INTERIOR

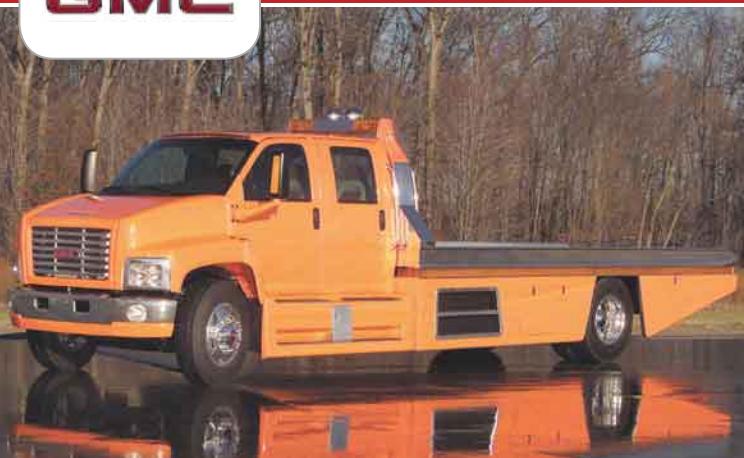

Regular Cab models can provide seating for the driver and 2 passengers. The four-door Crew Cab models provide room for the driver and 2 passengers up front, plus easy access and bench-seat comfort for up to 4 passengers in the rear. A tilt-telescopic steering column adjusts up and down, and fore and aft for the driver's comfort and convenience. Integral hydraulic power steering reduces driver effort while providing excellent road feel and feed back. Generous insulation in the headliner and door panels reduces noise for improved driving comfort.

ELECTRICAL

2 maintenance-free, 750 Cold Cranking Amps (CCA) batteries provide ample capacity for cranking and most electrical demands. Provisions for dealer installation of a third battery is provided. An 80 ampere alternator is standard.

TIRES

215/85 R-16 E (10 ply) tires are standard on W3500 and W4500 models. 225/70 R-19.5 F (12-ply) tires are used on W5500 models. All-season tires are standard on all models.

MODEL VARIATIONS

SINGLE REAR AXLE MODELS

Model C6C042/LOPRO

Modification – Available in wheelbases from 3556 mm (140 in.) to 6299 mm (248 in.) to handle nominal body lengths from 8 to 24 feet with GVWR up to 11,770 kg (25,950 lb.).

Models C6C042

- Conventional cab with wheelbases from 3251 mm (128 in.) to 7823 cm (308 in.) for nominal body lengths from 8 to 30 feet handling GVWR up to 11,770 kg (25,950 lb.).

Model C7C042 –Conventional cabs for either straight truck or tractor applications. Available in GVWR's to 13,608 kg (33,000 lb.). Wheelbases range from 3556 mm (140 in.) to 7823 mm (308 in.) to accommodate nominal body lengths to 30 feet.

Model C8C042 – Conventional cabs for either straight truck or tractor applications. Available in GVWR's to 17,690 kg (39,000 lb.). Wheelbases range from 3556 mm (140 in.) to 7823 mm (308 in.) to accommodate nominal body lengths to 30 feet.

TANDEM REAR AXLE MODEL

Model C8C064 – Conventional cabs for either straight truck or tractor application. Available in GVWR's up to 27,660 kg (61,000 lb.) and a maximum GCWR of 33,566 kg (74,000 lb.). Wheelbases range from 3860 mm (152 in.) to 7823 mm (308 in.) to handle nominal body lengths up to 30 feet.

SELECTED FEATURES

ENGINES

Vortec 8100 V8 gas engine (496 cu. in.) with 295 horsepower or 225 horsepower ratings
Duramax 7800 I-6 diesel engine with horsepower ratings from 200 to 275 (300 hp will be late availability).
Caterpillar 3126E I-6 diesel engine has a displacement of 7.2 L (439 cu. in.). Horsepower ratings range from 190 to 300 on most models to match specific demands.

TRANSMISSIONS

Allison 2000 Series 5-speed automatics are standard on C6500 and C7500 Series. An Allison MD3060P CR 6-speed is standard on C8500 single and tandem axle models. A full complement of 5-, 6-, 7-, 9- and 10-speed manual transmissions are also available.

FRONT AXLES

I-Beam axles with capacities that range from 3629 kg (8000 lb.) up to 7258 kg (16,000 lb.) are available depending on Series. Front axles are a wide-track design with a wheel turn angle of 53° for excellent manoeuvrability.

REAR AXLES

Dana rear axles are available in both single speed and two-speed models (except C6C042/LOPRO) for single axle models with capacities ranging from 6804 kg (15,000 lb.) up to 11,794 kg (26,000 lb.). Tandem axles are available with 15,422 kg (34,000 lb.) to 20,412 kg (45,000 lb.).

FRAMES

Straight full depth, C-shaped side rails (except C6H042/LOPRO). Three different materials and strengths are available depending on model. Inverted "L" frame reinforcements are available.

SUSPENSIONS

3 different suspension types are available on single axle models: multi-leaf, tapered-leaf and air suspension. Front shock absorbers standard. Front and rear stabilizer bars are available as required, depending upon suspension specified. Auxiliary springs are available for most rear suspensions. Tandem axle models feature Hendrickson Walking Beam suspensions with ratings up to 20,866 kg (46,000 lb.).

BRAKES

Hydraulic power-assisted self-adjusting disc brakes are standard on C6500 and C7500 Series. Meritor "S" cam-type air brakes are standard on C8500 series, both single axle and tandems, and available on C7500 Series. 4-wheel ABS is standard with all models.

CAB

A new, larger cab with exterior roof drip mouldings is standard on all Series. All glass is Solar-Ray tinted and all major panels, except the roof, are 2-sided galvanized steel.

HOOD

The standard hood, is a fibreglass aerodynamic sloping tilting hood, with the grille mounted to the hood. A fixed grille is optional.

ELECTRICAL

An upgraded electrical system supports the increased level of electronic controls and provides more reliability/durability. Multiplexing sends digitally coded messages on the same wiring, greatly reducing the number of wires and splices in addition to expanding diagnostic capability. A 160-amp alternator can be specified.

GMC offers many other options and features too numerous to detail here. To order a Kodiak to meet your needs, consult your Fleet Representative.

Since its launch, the GMC T-Series has set a new benchmark in medium-duty tilt cabs. It is engineered to provide the superior manoeuvrability, visibility and advanced features you expect from a tilt cab, plus the uncommon strength and versatility you expect from GMC. The T-Series offers hydraulic disc brakes or air brakes. Either way, a four-wheel anti-lock braking system (ABS) is standard.

NEW FOR 2004

GMC T-Series

GVWR - 14,969 kg
(33,001 lb.) and over

MODEL VARIATIONS

SINGLE REAR AXLE MODELS

T6F042: GVWR 11,793 kg
(26,000 lb.)

T7F042 : GVWR up to
17,054 kg (37,600 lb.)

TANDEM REAR AXLE MODEL

T7F064: GVWR up to
24,764 kg (54,600 lb.)

Both models offer eleven wheelbases ranging from 325 to 660 cm (128 to 260 in.) for body lengths of 10 to 34 ft.

SELECTED FEATURES

ENGINES

All T-Series feature long-lasting and fuel efficient diesel power. Duramax 7800 7.8L six cylinder diesels are standard and provide horsepower ratings from 200 up to 300* to match the needs of most applications. They utilize an electronically controlled high pressure, common rail fuel system with pilot injection for smooth, quiet operation.

* 275 and 300 gross horsepower ratings late availability.

TRANSMISSIONS

Allison 5-speed automatic transmission is standard on F6B042 and F7B042 models. A 6-speed Allison automatic transmission is

standard on F7B064 models. **CAB**

Manual transmissions are offered in 6, 9 or 10-speed configurations.

FRONT AXLES

I-Beam front axles with capacities from 4,536 to 6,622 kg (10,000 to 14,600 lb.). Shock absorbers and tapered leaf springs are standard on single rear axle models. Multi-leaf front suspensions are available.

REAR AXLES

Full-floating design axles are used for all models. Capacities range up to 6,804 kg (15,000 lb.) on F6B042 to 10,430 kg (23,000 lb.) on F7B042 to 18,144 kg (40,000 lb.) on F7B064.

GMC T-Series cab-over-engine design has BBC dimensions of 219 cm (86 in.), much shorter than conventional cab models. Cabs tilt up to provide excellent access to the engine, clutch and transmission. Cab features include: adjustable high-back driver's and passenger's bucket vinyl seat trim – power steering – tilt and telescopic steering column – flow-through ventilation system – tinted glass and heater/defogger with side window defogger vents. A door opening of 85° combined with 2 entry steps and 3 grab handles eases entry and exit. The RH door features a power window and a lower visibility window.

COMMITMENT

EVERY GM VEHICLE COMES WITH PEACE OF MIND AS A STANDARD FEATURE

We're not only committed to engineering and manufacturing vehicles that are rewarding to drive – we're equally committed to making the ownership experience just as responsive to your specific needs. You'll find that our comprehensive support programs make it easier to purchase or lease a GM car or light-duty truck. They also help to protect you and your vehicle down the road. A powerful example of the level of protection you can expect is the GM TOTAL™ Warranty. It is so comprehensive, it covers your vehicle – from the roof right down to the tires. So when you drive off the lot of your GM dealership, you can do so with total confidence. Peace of mind is knowing that your vehicle is built for the long haul, and is backed by a comprehensive warranty:

GM TOTAL™ WARRANTY

The GM TOTAL™ Warranty is your promise of total warranty protection. It covers every new GM car or light-duty truck for 3 years or 60,000 km.* Complete vehicle repairs are covered,[†] including parts and labour, with no deductible. The warranty also includes:

- 3-year/60,000 km* complete vehicle repair coverage
- 6-year/160,000 km* corrosion perforation coverage
- 8-year/130,000 km* coverage on catalytic converters and powertrain control modules (PCMs)

*Whichever comes first.

[†]To correct any defects in material or workmanship occurring during the warranty period. Regular maintenance is not included, nor is excessive wear and tear caused by reckless or negligent driving.

EXTENDED POWERTRAIN WARRANTY

Chevrolet Aveo, Optra, Epica, Cavalier and Venture, Oldsmobile Alero, Silhouette and Bravada, Pontiac Montana, Sunfire and Vibe, and all Saturn models are also covered by a special Powertrain Component Warranty with no deductible for 5 years or 100,000 km.* So you can count on your GM car or light-duty truck for much more than its versatility and engineering – today, and down the road.

*Whichever comes first.

OTHER OWNERSHIP PRIVILEGES AND PROGRAMS:

- Roadside Assistance – 24/7 service via toll-free number during your warranty period, anywhere in Canada or the United States
- Courtesy Transportation – may be offered during warranty period
- GM Protection Plan (GMPP) – the only extended service contract backed by the resources and commitment of General Motors; GMPP may be purchased at the time of your sale or lease, or subsequently
- GM Mobility Program – You may be eligible for reimbursement of up to \$1000 (taxes included) for adaptive equipment for your GM vehicle
- GM Accessories – personalize your vehicle with GM Accessories, specifically engineered for your new GM vehicle
- GM Goodwrench Service – with GM-certified technicians and GM-approved parts, nobody knows your GM vehicle better

TO HELP YOU PURCHASE OR LEASE A GM VEHICLE

- GMAC financing – on-the-spot financing at your GM dealership
- GMAC SMARTLEASE – a smart alternative to traditional financing

INFORMATION RESOURCES:

You can find more information about these programs from your GM dealer, or at these information centres:

- The GM Web site at gmcana.ca
- The GM Customer Communication Marketing Centre at 1-800-GM-DRIVE (1-800-463-7483 or 1-800-263-3830 for TDD users) – for information about any GM product or service, including The GM Card and the GM Mobility Program
- For information about GMAC visit the GM Web site or call 1-800-616-4622

A WORD ABOUT THIS PRODUCT GUIDE

The vehicles described in this guide incorporate components produced by General Motors of Canada Limited and related companies and suppliers. During manufacturing, different components than initially scheduled may be used. All illustrations and specifications contained in this guide are based on the latest production information at the time of publication approval. The right is reserved to make changes at any time, without notice, in prices, programs, policies, colours, materials, equipment, specifications and models, and to discontinue models. Some of the equipment shown or described throughout this guide is available at extra cost or can be ordered only in conjunction with other optional equipment. Some options may not be available when your vehicle is built. Check with your local General Motors Dealer Fleet Manager or Commercial Truck Manager for complete information.

General Motors, GM, the GM emblem, the GM Canada Web site address, Chevrolet, the Chevrolet emblem, Aveo, Cavalier, Z24, Epica, Optra, Malibu, Maxx, Impala, the Impala logo, Monte Carlo, the Monte Carlo logo, Corvette, the Corvette emblem, SSR, Avalanche, Tracker, S-10, Blazer, TrailBlazer, Silverado, Tahoe, Suburban, Venture, Astro, Express, Oldsmobile, the Oldsmobile logo, Alero, Bravada, Silhouette, Pontiac, the Pontiac emblem, Aztek, WideTrack, Sunfire, Grand Am, Grand Prix, Bonneville, SSEI, Montana, Vibe, Versatrak, Buick, the Buick emblem, Century, Regal, Rainier, Rendezvous, LeSabre, Park Avenue, Cadillac, the Cadillac emblem, Cadillac Owner Privileges, Cadillac Roadside Service, DeVille, Seville, SLS, STS, CTS, Escalade, EXT, ESV, XLR, GMC, the GMC logo, Sonoma, Jimmy, Envoy, Sierra, Denali, Yukon, Safari, Savana, Hummer, H2, Saturn, the Saturn emblem, ION, L-Series, Vue, Autotrac, DEX-Cool, Dexron, Magnasteer, Midgate, Northstar, OnStar, PASSLOCK, QuickDrain, RainSense, Solar-Ray, SMARTLEASE, Stabilitrak, Tilt-Wheel, Twilight Sentinel, Vortec and the GM TOTAL Warranty are trade marks of the General Motors Corporation and/or General Motors of Canada Limited. See your Dealer/Fleet Representative for vehicles not described in this brochure, i.e. certain Chevrolet and GMC commercial vehicles.

CADILLAC:

As the owner of a Cadillac, your satisfaction is assured by one of the industry's most extensive suites of owner privileges.

- Cadillac No-Charge Scheduled Maintenance pays for all regularly scheduled maintenance for the first 4 years or 80,000 kilometres* of ownership. Services covered include • Lube, oil and filter changes • Tire rotation • Air cleaner and filter inspection and replacement • Fuel system inspection.
- The Cadillac Warranty covers all parts and labour costs that may be incurred to correct defects in material or workmanship for the first 4 years or 80,000 kilometres.* In addition, body panels are warranted against rust-through for 6 years or 160,000 kilometres*, and the catalytic converter and powertrain control module are warranted for 8 years or 130,000 kilometres
- Cadillac Roadside Service provides you with 24-hour roadside assistance throughout Canada and the United States should you require towing, fuel delivery, a jump start or help with a flat tire or lock-out situation.
- Trip Interruption Protection ensures that you will be reimbursed by General Motors of Canada for reasonable/certain hotel, meal and alternative transportation expenses incurred should your trip be interrupted by a repair covered under the Cadillac Warranty.

- Courtesy Transportation is available whenever you need repairs covered under the Cadillac Warranty or maintenance covered under the Cadillac No-Charge Scheduled Maintenance plan. See your Cadillac dealer for full details on these and other Cadillac Owner Privileges.

*Whichever comes first.

SAAB:

All Saab customers enjoy Saab's commitment to complete customer satisfaction. You can count on excellent service throughout your entire ownership experience. The Saab Warranty covers all parts and labour costs that may be incurred due to defects in material or

workmanship for 4 years or 80,000 km.* It also includes a 6-year anti-corrosion warranty with unlimited mileage. Saab Roadside Assistance provides emergency assistance 24 hours a day, 365 days a year anywhere in Canada or the United States throughout the Saab Warranty period. For more details on Saab's commitment to your long-term satisfaction, see your Saab dealer.

*Whichever comes first.

TECHNICAL SERVICE TRAINING:

General Motors provides the highest quality technical service training in the fleet business – essential for helping technicians keep up with today's rapidly evolving automotive systems.

GM's dedicated Fleet Classroom Training is a specialized course of instruction customized to individual fleet requirements and taught by qualified GM instructors. For do-it-yourself training, there are GM Authentic Training Materials, the same in-depth training manuals developed for GM dealer-technicians. Also available is Certified Plus Video Training, a specially created video training program. For Fleet Training information, call 1-888-456-6660.
